## **Activity Report of the Board of Directors**

SALAMA's Board of Directors is pleased to present the 43<sup>rd</sup> board of directors report, along with audited consolidated financial statements for the year ended on December 31, 2022.

SALAMA, one of the oldest and most established takaful insurance companies in the Middle East, takes great pride in being a pioneer in this relatively new but growing segment of the Islamic insurance industry. We constantly strive to maintain our outstanding reputation, strengthening business practices and adopting customer-centric, technology-driven offerings solutions that drive growth.

### **Company Performance**

SALAMA subsidiaries and associates have performed well within their respective markets in 2022, a year marked by challenging macroeconomic conditions. The company reported a net profit of AED 42.462Mn, with total Gross Written Contributions (GWC) of AED 1.12Bn.

In 2022, SALAMA accelerated its underwriting transformation with the aim of enhancing core business performance. Our overall GWC grew by 2.8%, and 9.1% in the UAE despite an increasingly competitive landscape. Additionally, we have implemented a cost optimization framework across our group of companies while maintaining high levels of efficiency.

A revitalized investment strategy has resulted in an increase in the Group's investment income from AED 18.427Mn in 2021 to AED 40.660Mn in 2022. The growth reported factors in realized and unrealized losses arising from SALAMA KSA shares, which amounted to AED 18.979Mn.

The Group's subsidiaries have also demonstrated tangible performance gains in 2022, generating profit amid regional challenges including the devaluation of the Egyptian pound and CFA franc, which dropped by an average rate of 22.44% and 12.43%, respectively.

The Board's priority remains to underwrite risk which has somewhat hindered our growth ambitions. Nevertheless, we believe this approach to be crucial to establishing a solid foundation, upholding our responsibility as a leading market player within an ever-evolving insurance ecosystem. As directed by the Board, management continues to attempt a prudent balance between increasing revenues and maintaining consistent, disciplined underwriting performance.

### **Awards and Recognition**

SALAMA was awarded "Takaful Specialist of the Year" at the prestigious 2023 MENA IR Awards 2023, which recognize and reward leading insurers, reinsurers, and brokers within the Middle Eastern and North African markets. In addition, the company was also awarded "Takaful Company of the Year" at the eighth edition of the InsureTek International Conference & Golden Shield Excellence Awards 2023. Overall SALAMA has won a total of 13 Awards as listed below:

- Takaful Company of the Year at InsureTek Middle East 2023
- Takaful Specialist at the Mena Insurance Awards 2023
- Best Takaful Provider at MEA Finance Industry Awards 2022
- Best Omnichannel Customer Happiness Initiative at Customer Happiness Summit & Awards 2022
- Best Online Insurance Company UAE 2022 at 2022 Global Banking & Finance Awards®
- Best Takaful Solutions Brand at GLOBAL BRANDS AWARDS 2022
- Best Takaful Company UAE 2022 at International Business Magazine Awards
- Insurance Brand of the Year UAE 2022 at 2022 Global Banking & Finance Awards®
- Most Innovative Takaful Solution Provider at World Business Outlook Awards 2022
- Leading Innovative Takaful Solution Provider at InsureTek Middle East 2022
- Takaful Specialist of the Year at The Mena Insurance Awards 2022
- Best Takaful Company - UAE 2022 at Global Economics Awards 2022 - UAE
- Most Innovative Takaful Company - UAE 2022 at Global Economics Awards 2022 - UAE

## Growth and Expansion

In light of the foregoing, SALAMA is prioritizing financial management and risk assessment, while looking toward opportunities to scale business through the proposed acquisition of insurance portfolios.

On October 14, 2022, Takaful Emarat (TE) was to be amalgamated with SALAMA which would be the surviving entity acquiring all assets and liabilities. The transaction, exercisable on a cashless basis, would see the allotment of new shares in SALAMA to TE shareholders. However, on February 16, 2023, SALAMA announced that it was no longer considering said amalgamation, but exploring alternative agreements instead such as the potential acquisition of TE's takaful operations alone, and not the company's assets.

On December 28, 2022, the Board approved the acquisition of non-life portfolios from Dubai Islamic Insurance and Reinsurance Company (Aman), including the purchase of Aman's General, Motor, Medical, and Group Family Takaful solutions. The portfolio value/purchase price is AED 15 million, subject to customary adjustments and regulatory approvals.

The acquisition is expected to create synergies in SALAMA, expanding its market-leading position, and creating value for shareholders. Both parties are in the final stages of discussion and plan to sign binding agreements and obtain the required Sharia and regulatory approvals. The transaction's targeted execution date is subject to receiving approvals and completing portfolio transfers as planned and agreed by the two entities.

## Capital Reduction

On February 7, 2023, SALAMA's General Assembly in its meeting held on Monday corresponding to 16 January 2023, approved capital reduction to write off the company's accumulated losses by canceling 270,411,002 shares at a value of one UAE Dirham per share.

The action was implemented in line with an external audit on capital reduction, presented to the general assembly at the meeting.

The company's Board of Directors, in a meeting held on August 5, 2022 proceeded with the reduction of share capital by 270,411,002 from AED 1,210,000,000 on March 24, 2023. As a result of the share reduction, the capital of the company became AED 939,588,998 divided into 939,588,998 shares with a nominal value of one UAE Dirham per share.

## Solvency

SALAMA has restored solvency position in Q3-2022 after being technically insolvent as a result of disqualifying assets (under legal cases) and changes in regulation impacting the admissibility of al-qard al-hasan. The Central Bank of the UAE's guidance and support were instrumental to SALAMA in terms of capital strength and solvency.

## Audit Qualifications

The company's Board and Management have been working diligently to address Audit Qualification, which resulted in reducing non-qualifying assets by AED 5.569 and qualifying assets from AED 294.04Mn to AED 288.47Mn.

## Regulatory Framework

The UAE has continued to bolster the regulatory framework in 2021 and 2022. The Board is confident that the evolving regulatory and policy environment will be increasingly more conducive to a strong insurance ecosystem.

## Concluding Remarks

The Board remains committed to reinforcing the realignment of SALAMA's investment strategy, with the continued support of our stakeholders toward business growth. SALAMA has maintained an S&P Global Rating of BBB with CreditWatch Negative.

We remain optimistic about SALAMA, and its subsidiaries', the long-term growth in view of our strong balance sheet and 'AAA' capital adequacy. The current macroeconomic volatility is a source of reflection, likely to offer attractive avenues of organic and inorganic growth, which the Board continues to explore.

The Board of Directors would like to extend its sincerest gratitude to clients, reinsurers, regulators, and all other partners for their continued support. We would also like to thank management and staff across all subsidiaries for their dedication and contributions.

Board of Directors

Mr. Jassim Alseddiqi – Chairman  
Mr. Saeed Mubarak Al-Hajeri – Vice Chairman  
Mr. Fraih Saeed AlQubaisi – Board Member  
Mr. Ahmad Al Sadah – Board Member  
Mr. Saeed Al Qassimi – Board Member  
H.E. Mohammed Abdul Aziz Al Shehhi– Board Member  
Mr. Ajit Vijay Joshi– Board Member

On Behalf of the Board,

Jassim Alseddiqi  
Chairman of the Board of Directors  
March 20, 2023

## **INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC**

### **Report on the audit of the consolidated financial statements**

#### **Qualified opinion**

We have audited the consolidated financial statements of Islamic Arab Insurance Co. (Salama) PJSC (the Company) and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at 31 December 2022, and the consolidated statement of profit or loss, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, except for the effects of the matters described in the Basis for qualified opinion section of our report, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2022 and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

#### **Basis for qualified opinion**

The Group's total assets include investment properties with a carrying amount of AED 143,776 thousand (2021: AED 142,055 thousand), investments which are carried at AED 492,961 thousand (2021: AED 559,066 thousand) and other assets and receivables which are carried at AED 232,649 thousand (2021: AED 256,354 thousand). The aforementioned assets include:

- Investment property with a carrying amount of AED 84,957 thousand (2021: AED 84,957 thousand) (note 7);
- Available-for-sale investments of AED 58,244 thousand (2021: AED 62,561) and held to maturity investments of AED 111,627 thousand (2021: AED 112,880) (note 11); and
- Other receivables with a carrying amount of AED 33,639 thousand (2021: AED 33,639 thousand) (note 17).

Due to the ongoing litigations between the Group and different parties, we were unable to obtain sufficient appropriate audit evidence about the carrying amount of the aforementioned assets because we were unable to verify the judgements applied and estimates made in the determination of the fair value of the investments, and we were unable to determine if the Group legally owned these investments. Consequently, we were unable to determine whether any adjustments to these amounts were necessary. This matter has been in note 33 to the consolidated financial statements.

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the financial statements* section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in the United Arab Emirates, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified opinion.

## **INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC (continued)**

### **Key audit matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the consolidated financial statements of the current year in addition to the matter described in the Basis for qualified opinion section, we have determined the matters described below to be the key audit matters to be communicated in our report. These matters were addressed in the context of the audit of the consolidated financial statements as a whole, and in forming the auditor's opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

## INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC (continued)

### Key audit matters (continued)

Key Audit Matter	How our audit Addressed the Key Audit Matter
<b><u>Valuation of takaful contract liabilities and retakaful contract assets</u></b>	
<p>As at 31 December 2022, takaful contract liabilities and retakaful contract assets amounted to AED 852 million and AED 385 million (2021: AED 903 million and AED 398 AED million) respectively.</p> <p>We focused on these balances because of the complexity involved in the estimation process, and the significant judgements that management and the directors make in determining the appropriateness and adequacy of the liability. The liabilities which includes claims reported and not settled, incurred but not reported and mathematical reserve are based on a best-estimate of the ultimate cost of all claims incurred but not settled at a given date, whether reported or not, together with the related claims handling costs. A range of methods may be used to determine these provisions. Underlying these methods are a number of explicit or implicit assumptions relating to the expected settlement amount and settlement patterns of claims.</p> <p>Retakaful assets are recognised when the related gross takaful liability is recognised according to the terms of the relevant retakaful contracts and their recoverability is subject to the probability of default and probable losses in the event of default by respective retakaful counterparties.</p> <p>Note 14 and 15 to these consolidated financial statements describes the elements that make up the takaful contract liabilities and retakaful contract assets.</p>	<p>The work that we preformed to address this key audit matter included the following procedures:</p> <ul style="list-style-type: none"> <li>• The evaluation and testing of key controls around the claims handling and reserve setting processes of the Group along with the recognition and release of retakaful assets. We examined evidence of the operation of controls over the valuation of individual claims reserves, such as large loss review controls and internal peer reviews (whereby reviewers examine documentation supporting claims reserves and consider if the amount recorded in the financial statements is valued appropriately).</li> <li>• We checked samples of claims reserves and the respective share of reinsurance assets, through comparing the estimated amount of the reserve to appropriate documentation, such as reports from loss adjusters and where relevant inspection of the Group's correspondence with lawyers and reinsurers where the claim are under investigation.</li> <li>• We reviewed management's reconciliation of the underlying group data recorded in the policy administration systems with the data used in the actuarial reserving calculations.</li> <li>• We tied the takaful contract liabilities and retakaful assets as recommended by the Group's actuary to the liabilities and assets in the consolidated financial statements.</li> <li>• We involved our actuarial specialist team members, to apply industry knowledge and experience and we compared the methodology, models and assumptions used against recognised actuarial practices.</li> <li>• We obtained the retakaful treaty summary for the year and verified the details in the summary to the respective agreements.</li> <li>• We reviewed the ratios of retakaful assets to related takaful contract liabilities to identify any variance from retakaful treaty arrangements.</li> </ul>

## INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC (continued)

### Key audit matters (continued)

Key Audit Matter	How our audit Addressed the Key Audit Matter
<p><b><u>Valuation of goodwill</u></b></p> <p>As at 31 December 2022, the carrying value of goodwill amounted to AED 114,639 thousand (2021: AED 114,639 thousand) arose from separate acquisitions made by the Group.</p> <p>Goodwill is allocated to cash generating units ('CGUs') for the purpose of impairment testing. Given the magnitude of the goodwill balance and the continued economic uncertainty in certain regions, it is important to ensure that the goodwill impairment review is approached in a robust manner to identify potential impairments, where necessary.</p> <p>The determination of their recoverable amount is complex and typically requires a high level of judgement, taking into account the different economic environments in which the Group operates. The most significant judgements arise over the forecast cash flows, discount rate and growth rate applied in the value-in-use valuation models.</p> <p>We considered the valuation of goodwill to be a key audit matter, given the significant judgements applied and estimates made when determining the recoverable amount.</p> <p>Note 6 to these consolidated financial statements describes the information of Goodwill.</p>	<p>The work that we performed to address this key audit matter included the following procedures:</p> <ul style="list-style-type: none"> <li>• Challenged the key assumptions used in the impairment model for goodwill, including specifically the operating cash flow projections, discount rates, and long term growth rates.</li> <li>• The key assumptions used for estimating cash flow projections in the Group's impairment testing are those relating to revenue growth and operating margin.</li> <li>• Compared these assumptions to externally derived data (where applicable) as well as forming our own assessment.</li> <li>• Engaged our internal fair value specialists who assisted in computing an independent assessment of the discount rates used and assessing the methodology used in preparing the impairment testing model.</li> <li>• Tested the integrity and mathematical accuracy of the impairment model.</li> <li>• Considered the sensitivity of the impairment testing model to changes in key assumptions.</li> <li>• We also considered the adequacy of the Group's disclosures in respect of its goodwill impairment testing and whether disclosures about the sensitivity of the outcome of the impairment assessment to reasonably possible changes in key assumptions properly reflected the risks inherent in such assumptions.</li> </ul>

## **INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC (continued)**

### **Other information**

Other information consists of the information included in the Directors' Report, other than the consolidated financial statements and our auditor's report thereon. Management is responsible for the other information.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### **Responsibilities of management and those charged with governance for the consolidated financial statements**

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with IFRSs, and in compliance with the applicable provisions of the Company's Articles of Association and of the UAE Federal Law No. (32) of 2021 and UAE Federal Law No. 6 of 2007, as amended, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

### **Auditors' Responsibilities for the Audit of the Consolidated Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

## **INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC (continued)**

### **Auditors' Responsibilities for the Audit of the Consolidated Financial Statements (continued)**

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosure are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditors' report unless law and regulations preclude public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF ISLAMIC  
ARAB INSURANCE CO. (SALAMA) PJSC (continued)**

**Report on other legal and regulatory requirements**

Further, as required by the UAE Federal Law No. 32 of 2021, except for the matters referred to in the *Basis for qualified opinion* paragraph, we report that for the year ended 31 December 2022:

- i) the Group has maintained proper books of account;
- ii) we have obtained all the information we considered necessary for the purposes of our audit;
- iii) the consolidated financial statements have been prepared and comply, in all material respects, with the applicable provisions of the Articles of Association of the Company and the UAE Federal Law No. 32 of 2021;
- iv) the financial information included in the Directors' report is consistent with the books of account and records of the Group;
- v) as disclosed in note 11 to the financial statements, the Group has investment in securities as at 31 December 2022;
- vi) note 16 to the financial statements discloses material related party transactions and balances, and the terms under which they were conducted;
- vii) note 44 to the consolidated financial statements discloses fees and penalties paid by the Group during the year ended 31 December 2022;
- viii) based on the information that has been made available to us, nothing has come to our attention which causes us to believe that the Group has contravened during the financial year ended 31 December 2022 any of the applicable provisions of the UAE Federal Law No. 32 of 2021 or its Articles of Association, which would have a material impact on its activities or its financial position as of 31 December 2022; and
- ix) the Group has no social contributions made during the year.

Further, as required by the U.A.E. Federal Law No. 6 of 2007 (as amended) and the related Financial Regulations for Insurance Companies, we report that we have obtained all the information and explanations we considered necessary for the purpose of our audit except for the matter described in the basis for qualified opinion section of our report. For disclosure on solvency ratios, refer note 46.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 1. GENERAL INFORMATION

Islamic Arab Insurance Co. (Salama) PJSC (the “Company”) is a public joint stock company, registered in the Emirate of Dubai, United Arab Emirates (UAE) and operates through various branches in the UAE. The registered office of the Company is P.O. Box 10214, Dubai, United Arab Emirates under registration number 42381 with Ministry of Economy and under registration number 17 with the Insurance Authority. The principal activity of the Company is the writing of all classes of general takaful and family takaful business, in accordance with Islamic Shari’ah principles and in accordance with the Articles of the Company, UAE Federal Law No. 32 of 2021 for commercial companies and UAE Federal Law No. (6) of 2007, concerning regulations of insurance operations.

On 20 September 2021, the UAE Federal Decree Law No. 32 of 2021 (“Companies Law”) was issued and came into effect on 2 January 2022 which repealed the UAE Federal Law No. 2 of 2015. The Companies have 12 months from 2 January 2022 (“the transitional period”) to comply with the provisions of the UAE Federal Decree Law No 32 of 2021. The Group complied with the new provisions and requirements of the UAE Federal Decree Law No 32 of 2021 and obtained approval from the CBUAE on the required amendments to its Articles of Association in order to align with the new provisions and the requirements. The Articles of Association will be finalized upon issuance of the certificate of amendments by the Securities and Commodities Authority.

The Company and its subsidiaries are referred to as “the Group”. Tariic Holding BSC (Tariic), a subsidiary of the Company, is an intermediate holding company in Bahrain and no commercial activities are carried out in the Kingdom of Bahrain. Details of the Company’s subsidiaries are mentioned in note 27 of these consolidated financial statements. The Group has the following principal subsidiaries which are engaged in insurance and reinsurance under Islamic Shari’ah principles:

Subsidiaries	Principal activities	Group’s ownership		Country of incorporation
		2022	2021	
Directly owned				
Tariic Holding Company B.S.C	No takaful operations	99.40%	99.40%	Kingdom of Bahrain
Misr Emirates Takaful Life Insurance Co.	Family Takaful	85.19%	85.19%	Egypt
Salama Immobilier	No takaful operations	84.25%	84.25%	Senegal
Egyptian Saudi Insurance House	General Takaful	51.15%	51.15%	Egypt
Through Tariic				
Salama Assurances Algeria	General Takaful	96.98%	96.98%	Algeria

### 2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs)

#### 2.1 New standards and interpretations effective after 1 January 2022

The following new and revised IFRSs, which became effective for annual periods beginning on or after 1 January 2022, have been adopted in these consolidated financial statements. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective. The application of these revised IFRSs has not had any material impact on the amounts reported for the current and prior years but may affect the accounting for future transactions or arrangements.

- Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 relating to ‘Interest Rate Benchmark Reform - Phase 2’, that address issues that might affect financial reporting after the reform of an interest rate benchmark, including its replacement with alternative benchmark rates;
- Amendments relating to IAS 16, IAS 37, IFRS 3 and some annual improvements on IFRS 1, IFRS 9, IAS 41 and IFRS 16;
- Amendment to IFRS 16 ‘Leases’ to provide lessees with an exemption from assessing whether a COVID-19 related rent concession is a lease modification. On 31 March 2021, the IASB published an additional amendment to extend the date of the practical expedient from 30 June 2021 to 30 June 2022.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs) (continued)

#### 2.2 New and revised IFRS standards and interpretations but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's consolidated financial statements are disclosed below.

The Group has not yet applied the following new and revised IFRSs that have been issued but are not yet effective:

- Amendments to IAS 1: Classification of Liabilities as Current or Non-current. Effective for annual period beginning on or after 1 January 2023.
- Amendments to IAS 8: Definition of Accounting Estimates. Effective for annual reporting periods beginning on or after 1 January 2023. Early adoption is permitted.
- Amendments to IAS 1 and IFRS Practice Statement 2: Disclosure of Accounting Policies. Effective for annual period beginning on or after 1 January 2023 with earlier application permitted.
- IFRS 17: Insurance Contracts. Effective for annual period beginning on or after 1 January 2023

Management anticipates that these new standards, interpretations and amendments will be adopted in the Group's financial statements as and when they are applicable and adoption of these new standards, interpretations and amendments, except for IFRS 17, mentioned below, may have no material impact on the consolidated financial statements of the Group in the period of initial application.

Management anticipates that IFRS 17 will be adopted in the Group's consolidated financial statements for the annual period beginning 1 January 2023. The application of IFRS 17 may have significant impact on amounts reported and disclosures made in the Group's consolidated financial statements in respect of its insurance contracts. However, it is not practicable to provide a reasonable estimate of the effects of the application of this standard until the Group performs a detailed review.

#### IFRS 17, 'Insurance Contracts'

IFRS 17 replaces IFRS 4 Insurance Contracts and is effective for accounting periods beginning on or after 1 January 2023, with early adoption permitted. The company expects to first apply IFRS 17 on that date. IFRS 17 establishes principles for the recognition, measurement, presentation and disclosure of insurance contracts, reinsurance contracts and investment contracts with discretionary participation features ("DPF").

The company has an IFRS 17 Steering Committee in place whose responsibility is to provide direction, recommend decisions and drive the implementation of the IFRS 17 project to ensure it is delivered successfully within the timelines set by the regulator and in line with the direction set by the board of directors. It comprises of senior management from various functions including finance, actuarial, information technology, operations, and reinsurance. Listed below are the key activities of the IFRS 17 Steering committee:

- Monitors IFRS 17 project implementation and makes recommendations on the proposed changes to the project objectives and scope.
- Provides direction on the delivery of the IFRS 17 implementation project and escalates and recommends actions to the board of directors.
- Reviews and approves proposed budget to-date, drawdowns, decisions and change requests based on the budget approved by the board.
- Acts as an escalation point for any risks and issues relating to the IFRS 17 project that require immediate attention of the business or escalation to the senior management and / or the board of directors, as necessary.
- Provides oversight on project decisions and risks impacting the business.

The company has implemented an IFRS 17 core system to cater to the requirements of IFRS 17 standard and is currently in the implementation phase and working on making the necessary adjustments / enhancements in the IFRS 17 system and in providing the necessary data into the system for the extraction of IFRS 17 results.

The IFRS 17 Non-Life models have been set up for all classes including transition models. All Non-Life modelling has been carried out using the Premium Allocation Approach (PAA). However, the company is further collecting and fine-tuning the data to extract accurate IFRS 17 results.

For the Life portfolio, the IFRS 17 models have been built including allowance for Risk Adjustment, and other required input assumptions. The developments for investment component and coverage units have been incorporated. These models will be used to calculate transition balances in line with the transition approach selected for each portfolio.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs) (continued)

#### 2.2 New and revised IFRS standards and interpretations but not yet effective (continued)

##### IFRS 17, 'Insurance Contracts' (continued)

###### *Significant Judgements and Accounting Policy Choices*

The Group is expected to apply the following significant accounting policies in the preparation of financial statements in accordance with IFRS 17:

###### *a) Combination/Unbundling of Contracts*

The investment components included in the life insurance contracts are highly interrelated to the insurance component and are thus not distinct. Accordingly, Salama shall not unbundle the cash flows related to the investment component.

In the case of non-life policies/general takaful, roadside assistance is the only service component that is offered along with the motor policies. However, since these are dependent upon the insured event (such as mechanical issues in case of a breakdown) and the road-side assistance cover also ends once the policy expires, these are not distinct. Thus, Salama shall not unbundle the roadside assistance offered along with motor policies.

###### *b) Level of Aggregation - Portfolio*

While deciding on the portfolio level under IFRS 17, Salama has considered the criteria of "similar risk and managed together" while considering the materiality of each product / portfolio.

###### *Similar Risks*

The risks to be considered when defining portfolios should be insurance risks that the company accepts from the policyholder and non-financial risks. Contracts within the product line would be expected to have similar risks and hence would be expected to be in the same portfolio, if they are managed together.

###### *Managed Together*

Portfolio is managed together when it is analyzed and used in aggregate for decision making reporting and assessment of business performance.

From the company's analysis of its products, the level of aggregation is based on the nature of the business, features of the product and the contract boundary, while considering the materiality of each product / portfolio. Based upon these factors, the company has identified the below portfolio, along with the measurement model applicable on each portfolio:

<i>Portfolio</i>	<i>Measurement Model</i>
Life Participating	Variable Fee Approach
Life Non-participating	General Measurement Model
Group Life	Premium Allocation Approach / General Measurement Model
Group Credit Life	General Measurement Model
Engineering	Premium Allocation Approach
Fire	Premium Allocation Approach
General Accident	Premium Allocation Approach
Liabilities	Premium Allocation Approach
Marine	Premium Allocation Approach
Motor	Premium Allocation Approach
Health	Premium Allocation Approach

**2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs) (continued)**

**2.2 New and revised IFRS standards and interpretations but not yet effective (continued)**

**IFRS 17, 'Insurance Contracts' (continued)**

*Significant Judgements and Accounting Policy Choices (continued)*

*c) Significant Judgements and Estimates*

*i. PAA eligibility assessment approach*

Premium allocation approach is a simplified measurement approach that the company can adopt if it reasonably expects that the PAA would produce a measurement for a group of contracts that would not differ materially from the one that would be produced applying the GMM, or if the coverage period of each contract in the group is one year or less.

The PAA applies to the liability for remaining coverage (LRC) and demonstrates the obligation that relates to the unexpired portion of the coverage period. The liability for incurred claims (LIC) is measured in the same way as done for GMM (with some choices available).

Salama performed the PAA Eligibility Test on the following portfolios.

- Fire
- Liability
- Engineering
- Motor
- Marine
- General Accident

Salama has decided to set the acceptable threshold for the comparison of LRC between PAA and GMM using a combination of relative and absolute materiality criteria. A group of contracts fails PAA eligibility only if the difference between the LRC under PAA and GMM is outside the acceptable level of both the relative as well as the absolute materiality threshold.

Based on the above-mentioned criteria, PAA Eligibility test were performed and based on the results all the above portfolios passed the PAA Eligibility Test, as the differences were less than the materiality thresholds.

*ii. Discounting*

Discount rates are required for discounting projected fulfilment cash flows and adjusting carrying amounts to reflect the time-value of money. This is relevant for the calculation of LRC, LIC, Contractual Service Margin (CSM) and loss component (as applicable). Thus, the key requirements of discount rates are that they:

- Reflect the time value of money, the characteristics of the cash flows and the liquidity characteristics of the insurance contracts.
- Are consistent with observable current market prices; and
- Exclude the effects of factors that affect observable market prices used in determining the discount rate, but do not affect the future cash flows of the insurance contract.

Considering the investment portfolio and the insurance contracts written by Salama, the entity has decided to proceed with the bottom-up approach to compute the discount rate. The bottom-up approach has been decided since a high asset-liability matching is not required.

*iii. Risk Adjustment*

The company shall adjust the estimate of the present value of future cash flows to reflect the compensation that the entity requires for bearing the uncertainty about the amount and timing of the cash flows that arise from non-financial risk.

The risks covered by the risk adjustment for non-financial risk are insurance risks and other non-financial risks such as lapse and expense risks.

The portfolios for which the company has adopted PAA simplification for the calculation of liability for remaining coverage, risk adjustment for LRC would only be estimated in case group of contracts recognized as onerous. For portfolios measured under general measurement model or the variable fee approach, risk adjustment would be required for the calculation of both LRC and LIC.

**2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs) (continued)**

**2.2 New and revised IFRS standards and interpretations but not yet effective (continued)**

**IFRS 17, 'Insurance Contracts' (continued)**

*Significant Judgements and Accounting Policy Choices (continued)*

iii. Risk Adjustment (continued)

The Company reviewed a range of possible methodologies to estimate the RA for LRC and LIC. For RA LIC, under non-life and group life lines of business, Salama has decided to use the Mack approach. For LRC RA, under non-life and group life, the Company has decided to use a simplified approach to calculate the RA.

For long term life contracts, the company will use the Provision for Adverse Deviation approach or the e-forms approach based on the availability of data for LRC RA. For LIC RA, since LIC is not significant for the individual life groups of contracts, the company will use the same risk adjustment % as calculated for LRC.

The percentile to be used for calculation of Risk Adjustment for non-life and life portfolios, will be finalized once the Risk Adjustment is run on the transition data.

iv. CSM release pattern

IFRS 17 determines the coverage units as the quantity of service provided under the contracts in the group and is determined by considering, for each contract, the quantity of benefits provided and its expected coverage. The company has established the relevant procedures for the derivation and release of CSM and the IFRS 17 systems implemented also have the capability to measure the LRC and subsequently release the CSM as per a defined release pattern.

Salama reviewed the available options under the standard for the coverage units – earned premium, sum assured, number of policies, etc. The company has decided to use the benefits expected to be provided by the Company (Investment and Insurance Services) under the different products as coverage units for long term life contracts. For non-life contracts, the Company has decided to use earned premium as the coverage units for group of contracts that would not be eligible for PAA (or as required for loss component calculation or PAA eligibility testing).

For all the groups of contracts for which the company has decided to apply the premium allocation approach for the measurement of LRC, the derivation of CSM and its release during the period is not required.

v. Onerosity determination

Under the PAA, the company shall assume no contracts in the portfolio are onerous at initial recognition unless facts and circumstances indicate otherwise. The company will perform the assessment of onerous contracts on an annual and underwriting year basis in conjunction with updated information on the profitability of the products. Furthermore, the assessment shall be repeated if facts and circumstances indicate that there are significant changes in the pricing, design, plans or forecasts of the product.

The company is in the process of establishing a process to capture onerous, potentially onerous, and profitable contracts by assuming the profitability of the different portfolios at the start of the underwriting year. The profitability of each portfolio shall be assessed separately, and different criteria will be used for non-life and life portfolios. For non-life portfolios, the company shall provide a series of estimates for historical combined ratios which will be adjusted to reflect the expected combined ratio and enable the differentiation between onerous, profitable and "others" group of contracts. For life portfolios, the Company shall calculate risk adjusted profit margin for long term life contracts. Once the portfolios are classified into groups according to the profitability, the company will not reassess the composition of the groups subsequently.

**2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs) (continued)**

**2.2 New and revised IFRS standards and interpretations but not yet effective (continued)**

**IFRS 17, 'Insurance Contracts' (continued)**

*Significant Judgements and Accounting Policy Choices (continued)*

*d) Accounting Policy Choices*

*i. Length of Cohorts*

Portfolio of contracts identified were separated to form annual cohorts, so each cohort contains contracts with issue dates no more than a year apart. Salama has decided that annual cohorts will be based on the issue year from 1st January to 31st December.

As the current financial reporting is done on a calendar year basis and all the financial reports are prepared on the calendar year basis, calendar year is most suitable for the company for the definition of annual cohorts. This will also be in line with reporting and regulatory timelines.

*ii. Use of other comprehensive income for insurance finance income or expense*

An entity may decide to include insurance finance income/expense either in the P&L or systematically allocate it between P&L and OCI. Generally, the option to systematically allocate between OCI and P&L is used to reduce volatility in P&L.

Salama has decided to account for the insurance finance income or expenses in P&L instead of disaggregating it between P&L and OCI. Since the majority of Salama's portfolio is short term, the impact of discounting is not expected to be material.

Further, for the group of contracts run under VFA, a significant level of interest rate volatility is not expected, since the volatility is absorbed by the CSM. Accordingly, Salama has decided to account for changes in LIC and LRC in the P&L for such contracts.

*iii. Unwinding of Discount on Risk Adjustment*

The Company has decided not to disaggregate the changes in the risk adjustment between the changes due to financial risks and non-financial risks.

Most of Salama's portfolio is short term with a short claims settlement pattern. Material impact of discounting on risk adjustment is not expected since most of the business is short tailed. Also, the option to not disaggregate the impact is operationally simpler.

Further, since Salama shall account for changes in insurance finance income / expense in the P&L, Salama has decided not to disaggregate the changes in the risk adjustment between the changes due to financial risks and non-financial risks.

*iv. Expense Attribution*

Salama has prepared an expense allocation model, on the basis of which, operating expenses have been classified into the following categories:

- Fully attributable expenses  
Expenses which are directly related to fulfilling an insurance obligation. Expenses such as commissions paid to brokers, are considered fully attributable expenses.
- Partially attributable expenses  
Expenses which are partially related to fulfilling an insurance obligation, such as office rent expense. Of the total expense, the attributable portion will be allocated to the group of contracts, and the non-attributable portion will be booked as other operating expense.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs) (continued)

#### 2.2 New and revised IFRS standards and interpretations but not yet effective (continued)

##### IFRS 17, 'Insurance Contracts' (continued)

###### *Significant Judgements and Accounting Policy Choices (continued)*

###### *a) Accounting Policy Choices (continued)*

- Non attributable expenses

Overhead expenses that would be incurred by any business organization, regardless of whether these expenses are utilized for fulfillment of insurance obligations would be expensed as incurred as part of 'other operating expenses' (i.e. out of scope of IFRS 17) – being considered predominantly corporate in nature, or any other expenses that cannot be allocated to group of contracts.

After the expenses were classified into attributable, partially attributable, and non-attributable expenses, they were further classified into the following classes.

- a) Acquisition cost
- b) Claims related expenses
- c) Maintenance expenses

- v. Deferral of Acquisition Cost

In applying the premium allocation approach, an entity may choose to recognize any insurance acquisition cash flows as expenses when it incurs those costs, provided that the coverage period of each contract in the group at initial recognition is no more than one year.

Salama currently amortizes acquisition cash flows for all lines expected to be measured using the PAA. The company will use the same approach under IFRS 17 as this would not only ensure consistency with current practice but would also be consistent with the treatment under GMM.

###### *b) Presentation and Disclosure*

IFRS 17 introduces a new way of presenting income and expenses relating to insurance contracts that moves away from premium based presentation approach for the statement of comprehensive income. It also introduces changes in the way insurance contract related account balances are presented in the statement of financial position.

In addition, IFRS 17 requires more granular and detailed disclosures to provide information on the composition and movements of the amounts recognized in the financial statements that arise from insurance contracts in the form of roll forward and reconciliation tables. Quantitative and qualitative information is also required to be disclosed relating to the significant judgments made when applying IFRS 17 and on the nature and extent of the risks that arise from insurance contract issued.

The guidelines related to financial statements and disclosures are as follows:

- i. Statement of Comprehensive Income

Companies are required to disaggregate the amounts recognized in the SOCI into insurance revenue, insurance service expenses and insurance finance income or expense. A mandatory subtotal called insurance service result includes insurance revenue and insurance service expenses, and includes results from the reinsurance contracts for which there is an option in the standard to present reinsurance cessions and recoveries separately or present them as a single line item. The company has opted to present them separately.

Furthermore, the insurance finance income and expenses related to insurance contracts issued and reinsurance contracts held shall also be represented separately.

- a) Insurance Revenue

Under PAA, insurance revenue for the period is the amount of expected premium receipts allocated during the period, excluding an investment component and adjusted for time value of money and the effect of financial risk. The allocation of insurance revenue for the period under PAA will be based on the passage of time.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs) (continued)

#### 2.2 New and revised IFRS standards and interpretations but not yet effective (continued)

##### IFRS 17, 'Insurance Contracts' (continued)

###### *Significant Judgements and Accounting Policy Choices (continued)*

###### *a) Presentation and Disclosure (continued)*

Whereas under GMM, insurance revenue for the period is the amount that reflects considerations charged for insurance coverage when earned. It includes mainly release of CSM, release of risk adjustment, expected benefits and expenses, amortization of insurance acquisition cashflows, premium adjustment, etc.

###### *b) Insurance Service Expenses*

The Company's insurance service expenses will comprise of the following items:

- Incurred claims and other incurred insurance service expenses
- Amortization of insurance acquisition cash flows
- Changes that relate to past service i.e., changes in fulfillment cashflows relating to the liability for incurred claims
- Changes that relate to future service i.e., losses on onerous groups of contracts and reversals of such losses

Changes that relate to past service refers to changes in fulfillment cash flows related to the liability for incurred claims. Any development of the incurred claims, including changes in expected cash flows and risk adjustment, will be reported in the insurance service expenses.

###### *c) Insurance Finance Income / Expenses*

In applying the premium allocation approach, entity shall measure the liability for incurred claims for the group of insurance contracts at the fulfillment cash flows related to the incurred claims. However, entity is not required to adjust future cash flows for the time value of money, if those cash flows are expected to be paid in one year or less from the date of claims being incurred.

As per the assessment performed, the Company has claim settlement pattern exceeding 12 months for some of its lines of business. Hence, Salama will adjust future cash flows for the time value of money and the effect of financial risk

Insurance finance income or expense of the company comprises of changes in the carrying amount of the liability for incurred claims arising from the unwinding of the discount rate and changes in discount rates that impact the fulfillment cash flows. For presentation purposes, the company has opted to include all financial income or expense for the period in the profit or loss.

Furthermore, company is required to present insurance finance income or expense related to the insurance contracts issued and reinsurance contracts held on the face of statement of comprehensive income.

###### *ii. Statement of Financial Position*

The company will present the following line items separately in the statement of financial position as required under IFRS 17:

- a) Insurance contracts that are assets
- b) Insurance contracts that are liabilities
- c) Reinsurance contracts that are assets
- d) Reinsurance contracts that are liabilities

The carrying amount of an insurance contract asset/liability is the sum of the liability of remaining coverage and the liability for incurred claims. Reinsurance contracts held that are either assets or liabilities, comprise liability for remaining coverage and liability for incurred claims that correspond to the ceded business.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs) (continued)

#### 2.2 New and revised IFRS standards and interpretations but not yet effective (continued)

##### IFRS 17, 'Insurance Contracts' (continued)

*Significant Judgements and Accounting Policy Choices (continued)*

##### b) Transition

Changes in accounting policies resulting from adoption of IFRS 17 will be applied using the Full Retrospective Approach (FRA) to the extent possible. However, if FRA for a group of insurance contracts is impracticable, then the company can choose either a Modified Retrospective Approach or Fair Value Approach.

The majority of the non-life policies written by Salama are short-term, i.e., having tenure of less than or equal to 12 months. Considering the short-term duration of policies and availability of the data, the company intends to apply the Full Retrospective Approach for the non-life portfolio.

Whereas for the Group life and Individual life portfolios, considering the long-term length of contracts and unavailability of data at the required level of granularity, Salama intends to use the Fair Value Approach (FVA). Salama will use IFRS 17 Fulfilment Cash Flow models and subsequently adjust them to calculate the fair value of insurance contracts and obtain the CSM at transition date.

##### IFRS 9 Financial Instruments

The amendments introduce two approaches for entities that apply IFRS 4 to reduce the impact of differing effective dates with IFRS 17 Insurance Contracts and IFRS 9 Financial Instruments: an overlay approach and a temporary exemption from applying IFRS 9. The amended IFRS 4:

- gives all companies that issue insurance contracts the option to recognise in other comprehensive income, rather than profit or loss, the volatility that could arise when IFRS 9 is applied before the new insurance contracts standard is issued (the "Overlay Approach"); and
- gives companies whose activities are predominantly connected with insurance an optional temporary exemption from applying IFRS 9 till the earlier of annual reporting periods beginning before 1 January 2023 or when IFRS 17 becomes effective. The entities that defer the application of IFRS 9 will continue to apply the existing financial instruments standard
  - IAS 39 until that time

An insurer that applies the Overlay Approach shall disclose information to enable users of the consolidated financial statements to understand:

- a) how the total amount reclassified between profit or loss and other comprehensive income in the reporting period is calculated; and
- b) the effect of that reclassification on the financial statements.

The amendments allowing the overlay approach are applicable when the insurer first applies IFRS 9.

An insurer that elects to apply the temporary exemption from IFRS 9 shall disclose information to enable users of the consolidated financial statements:

- a) to understand how the insurer qualified for the temporary exemption; and
- b) to compare insurers applying the temporary exemption with entities applying IFRS 9

The effective date of the amendments permitting the temporary exemption is for annual periods beginning on or after 1 January 2018. The temporary exemption is available for annual reporting periods beginning before 1 January 2023 and will expire once IFRS 17 becomes effective.

The Group qualifies for temporary exemption from applying IFRS 9 on the grounds that it has not previously applied any version of IFRS 9 and its activities are predominantly connected with insurance with the carrying amount of its liabilities within the scope of IFRS 4 being greater than 90 per cent of the total carrying amount of all its liabilities at 31 December 2015 and with no subsequent change in its activities.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of these consolidated financial statements are summarised below. These policies have been consistently applied to each of the years presented.

#### 3.1 Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and interpretation issued by the IFRS Interpretation Committee ("IFRSIC") applicable to companies under IFRS as issued by the International Accounting Standards Board ("IASB") and the applicable requirements of the United Arab Emirates (U.A.E.) Federal Law No. 32 of 2021, the United Arab Emirates (U.A.E.) Federal Law No. 6 of 2007 on Establishment of Insurance Authority and Organization of its Operations as amended and the CBUAE (formerly the UAE Insurance Authority) Board of Directors' Decision No. (25) of 2014 pertinent to the Financial Regulations for Insurance Companies. The consolidated financial statements comply with IFRS.

#### 3.2 Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis except for revaluation of certain financial instruments as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such basis, except for share-based payment transactions that are within the scope of IFRS 2, leasing transactions that are within the scope of IFRS 16, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in IAS 2 or value in use in IAS 36.

The principal accounting policies are set out below.

#### 3.3 Functional and presentation currency

These consolidated financial statements are presented in UAE Dirham (AED), which is the functional currency of the Company. Except as otherwise indicated, financial information presented in UAE Dirham has been rounded to the nearest thousand.

#### 3.4 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries as at 31 December 2022. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee
- The ability to use its power over the investee to affect its returns

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.4 Basis of consolidation (continued)

The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- the size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Company, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and consolidated statement of comprehensive income from the date the Group gains control until the date when the Company ceases to control the subsidiary.

Non-controlling interests in subsidiaries are identified separately from the Group's equity therein. Those interests of non-controlling shareholders that are present ownership interests entitling their holders to a proportionate share of net assets upon liquidation may initially be measured at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement is made on an acquisition-by-acquisition basis. Other non-controlling interests are initially measured at fair value. Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

When the Group loses control of a subsidiary, the gain or loss on disposal recognised in profit or loss is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), less liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as required/permitted by applicable IFRS Standards). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IAS 39 when applicable, or the cost on initial recognition of an investment in an associate or a joint venture. Details of the Group's subsidiary at 31 December 2022 are mentioned in Note 1.

#### 3.5 Business combination

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit and loss as incurred.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.5 Business combination (continued)

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with IAS 39, or IAS 37 Provisions, Contingent Liabilities and Contingent Assets, as appropriate, with the corresponding gain or loss being recognised in profit or loss.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date (i.e. the date when the Group obtains control) and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognised at that date.

#### 3.6 Investments in associates

An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case it is accounted for in accordance with *IFRS 5 Non-current Assets Held for Sale and Discontinued Operations*. Under the equity method, an investment in an associate is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate. When the Group's share of losses of an associate exceeds the Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.6 Investments in associates (continued)

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. On acquisition of the investment in an associate, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The requirements of IAS 36 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in an associate. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised is not allocated to any asset, including goodwill that forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

The Group discontinues the use of the equity method from the date when the investment ceases to be an associate. When the Group retains an interest in the former associate and the retained interest is a financial asset, the Group measures the retained interest at fair value at that date and the fair value is regarded as its fair value on initial recognition in accordance with IAS 39. The difference between the carrying amount of the associate at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate or a joint venture is included in the determination of the gain or loss on disposal of the associate. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that associate on the same basis as would be required if that associate had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognised in other comprehensive income by that associate would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when the associate or joint venture is disposed of.

When the Group reduces its ownership interest in an associate but the Group continues to use the equity method, the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a Group entity transacts with an associate of the Group, profits and losses resulting from the transactions with the associate are recognised in the Group's consolidated financial statements only to the extent of interests in the associate that are not related to the Group.

#### 3.7 Takaful contracts

##### 3.7.1 Classification

The Group issues contracts that transfer either takaful risk or both takaful and financial risks. The Group does not issue contracts that transfer only financial risks.

Contracts under which the Group accepts significant takaful risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholder are classified as takaful contracts. Takaful risk is significant if an insured event could cause the Group to pay significant additional benefits due to happening of the insured event compared to its non-happening.

Takaful contracts may also transfer some financial risk. Financial risk is the risk of a possible future change in one or more of a specified profit rate, security price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract.

Contracts where takaful risk is not significant are classified as investment contracts. Once a contract is classified as a takaful contract it remains classified as a takaful contract until all rights and obligations are extinguished or expire.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.7 Takaful contracts (continued)

##### 3.7.2 Recognition and measurement

Takaful contracts are classified into three main categories, depending on the duration of risk and whether or not the terms and conditions are fixed.

##### *General Takaful contracts*

Gross written contributions, in respect of annual policies, are recognised in the consolidated statement of profit or loss at policy inception. The contributions are spread over the tenure of the policies on a straight line basis, and the unexpired portion of such contributions are included under “unearned contributions” in the consolidated statement of financial position.

##### *Family Takaful contracts*

These contracts relate to human life events, for example death, bodily injury etc. For short term contracts, normally with group customers, the contributions are recognised when due. For long term contracts, normally with individual customers, the contributions are booked on receipt.

##### *Investment featured unit-linked contracts*

A unit-linked takaful contract is a takaful contract linking payments on the contract to units of investment funds administrated by the Group with the contributions received from the plan holder. These funds are administrated by the Group on behalf of plan holders in fiduciary trust as a Mudarib (Manager). In addition, Group manages Tabarru fund on behalf of plan holders to meet the obligations arising out of takaful operations. The Group has no recourse to the assets of Tabarru fund. An investment charge based on a certain percentage of value of fund is charged as fee. The liability towards the plan holder is linked to the performance of the underlying assets of these funds. This embedded derivative meets the definition of a takaful contract. Since all the liabilities arising from the embedded derivative are already measured at fair value and since all the investments on behalf of plan holders are classified as fair value through profit and loss, the Group does not account for embedded derivatives separately.

In case of a claim, the amount paid is the higher of the sum assured or the unit value. The liability is calculated through actuarial valuation based on the present value of expected benefits to plan holders.

Where the Tabarru Fund is insufficient to meet the liabilities, the shareholders shall grant profit free loan to the fund to meet its liabilities under the contracts held with participants. This loan is called Qard-e-Hasan. The Qard-e-Hasan is repaid to shareholders from the future surplus of Tabarru Fund.

The contribution after allocation to unit fund/investment fund of plan holder is called Takaful Donation and is taken to Tabarru fund from where Wakala fee is paid to shareholders. Takaful Donation is based on appropriate rates of mortality and morbidity. The Tabarru fund is a collective pool established, invested and managed in accordance with Shari'ah Principles with the purpose of providing benefits on the lives of covered members (plan holders) and for the repayment of Qard-e-Hasan (if applicable).

The individual life contracts contain investment participation feature. A surplus may arise in Tabarru fund after accounting for the claims, relevant expenses, investment returns and reserves. The surplus is available for the distribution to eligible participants provided there is net surplus in the Tabarru Fund in respect of the relevant year. The distribution is at the discretion of the Board of Directors. This contractual right is supplement to the other benefits mentioned in the contract.

These takaful contracts insure human life events over a long duration. However, Takaful contributions are recognised directly as liabilities. These liabilities are increased by fair value movement of underlying investments/unit prices and are decreased by policy administration fees, mortality and surrender charges and withdrawals, if any.

The liability for these contracts includes any amounts necessary to compensate the Group for services to be performed over future periods. This is the case for contracts where the policy administration charges are higher in the initial years than in subsequent years. The mortality charges deducted in each period from the contract holders as a group are considered adequate to cover the expected total death benefit claims in excess of the contract account balances in each period; no additional liability is therefore established for these claims.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.7 Takaful contracts (continued)

##### 3.7.3 Unearned contribution reserve

The unearned contribution considered in the unearned contributions reserve comprise the estimated proportion of the gross contribution written which relates to the periods of takaful subsequent to the consolidated statement of financial position date. Unearned contribution reserve is calculated using the 1/365 method except for marine and engineering business. The unearned contribution reserve for marine is recognised as fixed proportion of the written contribution as required in the financial regulation. The rate at which the contribution is earned is deemed to increase at the same rate at which the risk faced increases over the lifetime of the policy. Unearned contribution for Family Takaful business are considered by the Group's actuary in the calculation for family takaful reserve.

##### 3.7.4 Claims

Claims incurred comprise the settlement and the internal and external handling costs paid and changes in the provisions for outstanding claims arising from events occurring during the financial period. Where applicable, deductions are made for salvage and their recoveries.

Claims outstanding comprise provisions for the Group's estimate of the ultimate cost of settling all claims incurred but unpaid at the reporting date whether reported or not, and related internal and external claims handling expenses and reduced by expected salvage and other recoveries. Claims outstanding are assessed by reviewing individual reported claims. Provisions for claims outstanding are not discounted. Adjustments to claims provisions established in prior periods are reflected in the consolidated financial statements of the period in which the adjustments are made. The methods used, and the estimates made, are reviewed regularly.

##### 3.7.5 Gross claims paid

Gross claims paid are recognised in the consolidated statement of profit or loss when the claim amount payable to policyholders' and third parties are determined as per the terms of the takaful contracts.

##### 3.7.6 Claims recovered

Claims recovered include amounts recovered from retakaful companies in respect of the gross claims paid by the Group, in accordance with the retakaful contracts held by the Group. It also includes salvage and other claims recoveries.

##### 3.7.7 Gross outstanding and IBNR claims

Gross outstanding claims comprise the estimated costs of claims incurred but not settled at the consolidated financial position date. Provisions for reported claims not paid as at the date of consolidated statement of financial position are made on the basis of individual case estimates. This provision is based on the estimate of the loss, which will eventually be payable on each unpaid claim, established by the management in the light of currently available information and past experience. An additional net provision is also made for any claims incurred but not reported ("IBNR") at the date of consolidated statement of financial position on the basis of management estimates.

The retakaful share of the gross outstanding claims is estimated and shown separately.

##### 3.7.8 Contribution deficiency reserve

Provision is made for contribution deficiency arising from general takaful contracts where the expected value of claims and expenses attributable to the unexpired periods of policies in force at the consolidated financial position date exceeds the unearned contributions provision and already recorded claim liabilities in relation to such policies. The provision for contribution deficiency is calculated by reference to classes of business which are managed together, after taking into account the future investment return on investments held to back the unearned contributions and claims provisions.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.7 Takaful contracts (continued)

##### 3.7.9 Retakaful

The Group cedes retakaful in the normal course of business for the purpose of limiting its net loss potential through the diversification of its risks. Assets, liabilities and income and expense arising from ceded retakaful contracts are presented separately from the assets, liabilities, income and expense from the related takaful contracts because the retakaful arrangements do not relieve the Group from its direct obligations to its policyholders.

Amounts due to and from retakaful operators are accounted for in a manner consistent with the related contributions is included in retakaful assets.

Retakaful assets are assessed for impairment at each consolidated financial position date. A retakaful asset is deemed impaired if there is objective evidence, as a result of an event that occurred after its initial recognition, that the Group may not recover all amounts due, and that event has a reliably measurable impact on the amounts that the Group will receive from the reinsurer. Impairment losses on retakaful assets are recognised in consolidated statement of profit or loss in the year in which they are incurred.

Profit commission in respect of retakaful contracts is recognised on an accrual basis.

##### 3.7.10 Deferred commission cost

For short term takaful contracts, the deferred commission cost asset represents the proportion of acquisition costs which corresponds to the proportion of gross contributions written that is unearned at the date of consolidated statement of financial position and becomes part of unearned contribution reserves.

For individual family takaful and long term unit-linked takaful contracts, commission relating to takaful features are amortised systematically over the average policy life. Commission that relates to investments feature is allocated to Participants on prorata basis.

##### 3.7.11 Takaful receivables and payables

Amounts due from and to policyholders, agents, reinsurers and retakaful companies and liability towards Participant Investment Account are financial instruments and are included in takaful receivables and payables, and not in takaful contract provisions or retakaful assets.

##### 3.7.12 Family takaful reserves

The risk reserves are determined by the independent actuarial valuation of future policy benefits. Actuarial assumptions include a margin for adverse deviation and generally vary by type of policy, year of issue and policy duration. Mortality and withdrawal rate assumptions are based on experience. Adjustments to the balance of fund are affected by charges or credits to income.

##### 3.7.13 Salvage and subrogation reimbursements

Some takaful contracts permit the Group to sell property (usually damaged) acquired in settling a claim (salvage). The Group may also have the right to pursue third parties for payment of some or all costs (subrogation). Estimates of salvage recoveries and subrogation reimbursements are recognised as an allowance in the measurement of the takaful liability for claims.

##### 3.7.14 Liability adequacy test

At the end of each reporting period, the Group assesses whether its recognised insurance liabilities are adequate using current estimates of future cash flows under its insurance contracts. If that assessment shows that the carrying amount of its insurance liabilities is inadequate in the light of estimated future cash flows, the entire deficiency is immediately recognised in income and an unexpired risk provision is created.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.8 Revenue recognition

##### 3.8.1 *Takaful contract income*

Revenue from takaful contracts is measured under revenue recognition criteria stated under takaful contracts in these consolidated financial statements.

##### 3.8.2 *Profit from deposits*

Profit from deposits is accrued on a time basis, by reference to the principal outstanding and at the effective profit rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the asset's net carrying amount.

##### 3.8.3 *Dividend income*

Dividend income from investments is recognised when the Group's rights to receive payment have been established.

##### 3.8.4 *Fee and commission income*

Fee and commissions received or receivable which do not require the Group to render further service are recognised as revenue by the Group on the effective commencement or renewal dates of the related policies.

##### 3.8.5 *Rental income*

Rental income from investment properties which are leased under operating leases are recognised on a straight-line basis over the term of the relevant lease.

#### 3.9 Foreign currencies

The consolidated financial statements of the Group are presented in the currency of the primary economic environment in which the Group operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of the Group are expressed in Arab Emirates Dirhams ("AED"), which is the functional currency of the Company and the presentation currency for the consolidated financial statements.

In preparing the consolidated financial statements of the Group, transactions in currencies other than the Company's functional currency (foreign currencies) are recorded at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated at exchange rates prevailing on the reporting date. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the date of transactions are used. Exchange differences arising are recognised in other comprehensive income and accumulated in a foreign exchange translation reserve.

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation or a partial disposal of an interest in an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in a foreign exchange translation reserve in respect of that operation attributable to the owners of the company are reclassified to profit or loss.

In addition, in relation to a partial disposal of a subsidiary that includes a foreign operation that does not result in the Group losing control over the subsidiary, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (i.e. partial disposals of associates that do not result in the Group losing significant, the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.10 Employee benefits

##### 3.10.1 Defined contribution plan

U.A.E. national employees of the Group are members of the Government-managed retirement pension and social security benefit scheme pursuant to U.A.E. labour law no. 7 of 1999. The Group is required to contribute 12.5% of the “contribution calculation salary” of payroll costs to the retirement benefit scheme to fund the benefits. The only obligation of the Group with respect to the retirement pension and social security scheme is to make the specified contributions. The contributions are charged to profit or loss.

##### 3.10.2 Provision for employees’ end of service indemnity

Provision is also made for the full amount of end of service indemnity due to non-U.A.E. national employees in accordance with the U.A.E. Labour Law and is based on current remuneration and their period of service at the end of the reporting period. The provision relating to end of service indemnity is a non-current liability.

#### 3.11 Property and equipment

Land and buildings are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and any identified impairment losses. Revaluations are performed with sufficient regularity such that the carrying amounts do not differ materially from that which would be determined using the fair values at the reporting date.

Any revaluation increase arising on the revaluation of such land and buildings is credited in other comprehensive income to the revaluation reserve, except to the extent that it reverses a revaluation decrease for the same asset previously recognised in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously charged. A decrease in the carrying amount arising on the revaluation of such land and buildings is charged to profit or loss to the extent that it exceeds the balance, if any, held in the property revaluation reserve relating to a previous revaluation of that asset.

Other property and equipment are carried at cost less accumulated depreciation and any identified impairment losses.

Depreciation is charged so as to write off the cost or valuation of assets over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

The gain or loss arising on the disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

The estimated useful lives of these assets (except for land) are 4 – 10 years.

Capital work-in-progress is stated at cost incurred from the date of commencement of the project to the date on which it is capitalised. When capitalised, capital work-in-progress is transferred to the appropriate category of property and equipment and depreciated in accordance with the Group’s accounting policies.

#### 3.12 Investment properties

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in profit or loss in the period in which they arise, including the corresponding tax effect. Fair values are determined based on an annual valuation performed by an accredited external independent valuer.

Investment properties are derecognised either when they have been disposed of (i.e., at the date the recipient obtains control) or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the period of derecognition. In determining the amount of consideration from the derecognition of investment property the Group considers the effects of variable consideration, existence of a significant financing component, non-cash consideration, and consideration payable to the buyer (if any).

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.13 Intangible assets

##### *Goodwill*

Goodwill arises on the acquisition of subsidiaries. Goodwill is not amortised but is reviewed for impairment at least annually. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognised for goodwill is not reversed in a subsequent period. On disposal of a cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

##### *Computer Software*

Intangible assets are reported at cost less accumulated amortisation and identified impairment losses, if any. Amortisation is charged on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each annual reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. The useful lives considered in the calculation of amortisation is 3 - 5 years.

#### 3.14 Impairment of tangible and intangible assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

#### 3.15 Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.16 Income tax

The Company is not subject to any taxes on profits in the UAE. Taxation on foreign operations of the subsidiaries is provided for in accordance with fiscal regulations applicable in each territory.

#### 3.17 Policyholders' fund

Any deficit in the policyholders' fund is financed by the shareholders through Qard-e-Hasan as per their undertaking. The Group maintains a full provision against such balances (note 23).

#### 3.18 Leases

##### *The Group as lessee*

The Group assesses whether contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Group uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

- fixed lease payments (including in-substance fixed payments), less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the lessee under residual value guarantees;
- the exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease

The lease liability is presented as a separate line item in the consolidated statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using effective interest method) and by reducing the carrying amount to reflect the lease payments made.

The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- the lease term has changed or there is a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- the lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- a lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.

The Group did not make any such adjustments during the periods presented.

The right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use of asset reflects that the Group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use of assets are presented as a separate line in the consolidated statement of financial position.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.18 Leases (continued)

##### *The Group as lessee (continued)*

The Group applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for an identified impairment loss as described in the 'Property and equipment' policy.

Variable rents that do not depend on an index or rate are not included in the measurement of the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs and are included in the line 'General and administrative expenses' in the consolidated statement of comprehensive income.

As a practical expedient, IFRS16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Group has used this practical expedient.

##### *The Group as lessor*

The Group enters into lease agreements as a lessor with respect to some of its investment properties. Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Company's net investment outstanding in respect of the leases.

When a contract includes lease and non-lease components, the Company applies IFRS 15 to allocate consideration under the contract to each component.

#### 3.19 Financial assets

All financial assets are recognised and derecognised on trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the timeframe established by the market concerned, and are initially measured at fair value, plus transaction costs, except for those financial assets classified as at held for trading, which are initially measured at fair value.

Financial assets of the Group are classified into the following specified categories: bank and cash balance, available-for-sale securities, fair value through profit or loss, held to maturity investments and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

##### *3.19.1 Bank balances and cash*

Bank balances and cash comprise cash on hand and deposits and current accounts with banks that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

##### *3.19.2 Financial assets at fair value through profit or loss*

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term with any resultant gain or loss recognised in profit or loss.

##### *3.19.3 Held to maturity investment*

If the Group has the positive intent and ability to hold debt securities and islamic placements to maturity, and these debt securities and islamic placements have not been designated at fair value through profit or loss, then they are classified as held-to-maturity. Held-to-maturity investments are measured at amortised cost using the effective profit sharing rate, less any impairment losses.

**3. SIGNIFICANT ACCOUNTING POLICIES (continued)****3.19 Financial assets (continued)***3.19.4 Available-for-sale securities*

Available-for-sale securities are initially measured as cost, being fair value, including transaction costs, and are subsequently re-measured to fair value. Gains and losses arising from changes in fair value are recognised in other comprehensive income and accumulated in the cumulative changes in fair value of available-for-sale securities reserve with the exception of impairment losses, which are recognised in profit or loss. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the cumulative change in fair value is reclassified to profit or loss.

Dividend on available-for-sale securities are recognised in profit or loss when the Group's right to receive the dividend is established.

*3.19.5 Loans and receivables*

Takaful and other receivables (excluding prepayments) and due from related parties that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are initially measured at fair value, plus transaction costs and subsequently measured at amortised cost using the effective interest method, less any impairment. Interest income is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

*3.19.6 Impairment of financial assets*

Financial assets, other than those at held for trading, are assessed for indicators of impairment at the end of each reporting date. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the asset have been affected.

For investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For certain categories of financial asset, such as takaful and other receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio as well as observable changes in national or local economic conditions that correlate with default on receivables.

For held to maturity investment, the amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of insurance receivables, where the carrying amount is reduced through the use of an allowance account. When a contract receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

When an available-for-sale securities is considered to be impaired, cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss.

With the exception of available-for-sale, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

In respect of available-for-sale, impairment losses previously recognised in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognised in other comprehensive income.

*3.19.7 Derecognition of financial assets*

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire; or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.20 Financial liabilities and equity instruments issued by the Group

##### 3.20.1 Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

##### 3.20.2 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recorded at the proceeds received, net of direct issue costs.

##### 3.20.3 Treasury shares

When share capital recognised as equity is repurchased, the amount of the consideration paid, including directly attributable costs, is recognised as a deduction from equity. Repurchased shares are classified as treasury shares and are presented as a deduction from total equity in consolidated statement of changes in equity.

##### 3.20.4 Financial liabilities

Financial liabilities are classified as 'other financial liabilities'.

##### 3.20.5 Other financial liabilities

Takaful and other payables and due to related parties are classified as 'other financial liabilities' and are initially measured at fair value, net of transaction costs. Other financial liabilities (except for deferred reinsurance commission) are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis except for short term payable when the recognition of interest would be immaterial.

Takaful and other payables and due to related parties are classified as 'other financial liabilities' and are initially measured at fair value, net of transaction costs. Other financial liabilities (except for deferred reinsurance commission) are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis except for short term payable when the recognition of interest would be immaterial.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

##### 3.20.6 Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire.

##### 3.20.7 Dividend distribution

Dividend distribution to the Group's shareholders is recognised as a liability in the Group's consolidated financial statements in the period in which the dividend is approved by the Group's shareholders.

#### 3.21 Underwriting income attributable to policyholders and shareholders

As stated in note 1, the Group operates in accordance with Islamic Shari'ah principles. As a result, the net underwriting income from the operations of the Group is attributable to policyholders in accordance with the terms and conditions of takaful contracts acquired by the policyholder which stipulates that the insured, on taking out this policy from the Group becomes entitled to participate in the contributions pool with insured parties in the class of takaful on cooperative (mutual) basis.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 3. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### 3.21 Underwriting income attributable to policyholders and shareholders (continued)

The relationship of the insured with the Group is determined particularly as to his share in the surplus net of management expenses, liabilities for claims and necessary reserves, by the Board of Directors of the Group for the class of takaful at the end of fiscal year of the Group. The Group undertakes to pay such share to the insured in the net profits in accordance with the resolution of the Board of Directors of the Company after the close of fiscal year of the Group. However, the net underwriting income from the operations of subsidiaries is attributable to the shareholders in accordance with the regulations prevailing in the jurisdiction of each subsidiary.

#### 3.22 Operating segment

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components, whose operating results are reviewed regularly by the Group Management Committee (being the chief operating decision maker) to make decisions about resources allocated to each segment and assess its performance, and for which discrete financial information is available.

### 4. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in Note 3 to these consolidated financial statements, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

#### 4.1 Critical accounting judgements

The following are the critical judgements, apart from those involving estimations (see 4.2 below), that management has made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements.

##### 4.1.1 Classification of investments

Management decides on acquisition of an investment whether it should be classified as held to maturity, held for trading or available-for-sale. The Group classifies investments at held for trading if they are acquired primarily for the purpose of making a short term profit by the dealers.

Equity instruments are classified as available-for-sale securities when they are considered by management to be strategic equity investments that are not held to benefit from changes in their fair value and are not held for trading.

Management is satisfied that the Group's investments in securities are appropriately classified.

##### 4.1.2 Classification of properties

In the process of classifying properties, management has made various judgments. Judgments are needed to determine whether a property qualifies as an investment property, property and equipment, property under development and/or property held for sale. Management develops criteria so that it can exercise that judgment consistently in accordance with the definitions of investment property, property and equipment, property under development and property held for sale. In making its judgment, management has considered the detailed criteria and related guidance set out in IAS 2 – Inventories, IAS 16 – Property, plant and equipment, and IAS 40 – Investment Property, with regards to the intended use of the property.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 4. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

#### 4.1 Critical accounting judgements (continued)

##### 4.1.3 Determining the lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension, automatic renewal options are only included in the lease term if the lease is reasonably certain to be extended.

The assessment is reviewed if a significant event or a significant change in circumstances occurs which affects this assessment and that is within the control of the lessee.

#### 4.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

##### 4.2.1 The ultimate liability arising from claims made under takaful and retakaful contracts

The estimation of ultimate liability arising from the claims made under takaful contracts is the Group's most critical accounting estimate. There are sources of uncertainty that need to be considered in the estimate of the liability that the Group will eventually pay for such claims. Estimates have to be made both for the expected ultimate cost of claims reported and for the expected ultimate cost of claims incurred but not reported ("IBNR") at the end of each reporting period. Liabilities for unpaid reported claims are estimated using the input of assessments for individual cases reported to the Group and management estimates based on internal and external actuarial assessment, taking into account the historical data of the claims reported and settlement pattern. Further, a range of methods are used by management and the internal actuary/independent external actuary to determine these provisions. Underlying these methods are a number of explicit or implicit assumptions relating to the expected settlement amount and settlement patterns of claims. Changes in these assumptions can result in material impacts to the valuation of these liabilities. Such method takes into account the best estimates of the future contractual cash flows estimated based on the historical data. At the end of each reporting period, prior year claims estimates are reassessed for adequacy and changes are made to the provision.

The Group has performed an assessment of the impact of COVID-19 on its contractual arrangements and provisions for outstanding claims and claims incurred but not reported which included regular sensitivity analyses. The Group determined that there is no material impact on its risk position and provision balances for outstanding claims and claims incurred but not reported, as at 31 December 2022. The Group will continue monitoring its claims experience and the developments around the pandemic and revisit the assumptions and methodologies in future reporting periods.

##### 4.2.2 Impairment of takaful receivables

An estimate of the collectible amount of takaful receivables is made when collection of the full amount is no longer probable. This determination of whether the takaful receivables are impaired, entails the Group evaluating, the credit and liquidity position of the policyholders and the insurance/takaful companies, historical recovery rates and feedback received from the legal department. The difference between the estimated collectible amount and the book amount is recognised as an expense in the profit or loss. Any difference between the amounts actually collected in the future periods and the amounts expected will be recognised in the profit or loss at the time of collection.

##### 4.2.3 Liability adequacy test

At the end of each reporting period, liability adequacy tests are performed to ensure the adequacy of takaful contract liabilities. The Group makes use of the best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities in evaluating the adequacy of the liability. Any deficiency is immediately charged to the profit or loss.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 4. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

#### 4.2 Key sources of estimation uncertainty (continued)

##### 4.2.4 Amortization of deferred commission costs and deferred commission income

The amount of commission costs to be deferred is dependent on judgments as to which issuance costs are directly related to and vary with the commission. commission cost on long-term Takaful contracts without fixed terms with investment participation feature are amortised over the expected total life of the contract group as a constant percentage of estimated gross profit margins (including investment income) arising from these contracts in accordance with the accounting policy stated in note 3.8.10. The pattern of expected profit margins is based on historical and anticipated future experiences which consider assumptions, such as expenses, lapse rates or investment income and are updated at the end of each accounting period.

##### 4.2.5 Depreciation of property and equipment

The cost of property and equipment is depreciated over the estimated useful life, which is based on expected usage of the asset, expected physical wear and tear, the repair and maintenance program and technological obsolescence arising from changes and the residual value. Management has not considered any residual value as it is deemed immaterial.

##### 4.2.6 Impairment of available-for-sale securities - Unquoted

The Group determines whether available for sale securities are impaired when there has been a significant or prolonged decline in their fair value below cost. This determination of what is significant or prolonged requires judgement. In making this judgement and to record whether impairment occurred, the Group evaluates among other factors, the normal volatility in share price, the financial health of the investee, industry and sector performance, changes in technology and operational and financial cash flows.

##### 4.2.7 Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value-in-use of the cash generating units to which goodwill is allocated. Estimating the value-in-use required the Group to make an estimate of the expected future cash flows from each cash generating unit and also to choose a suitable discount rate in order to calculate the present value of those cash flows.

##### 4.2.8 Discounting of lease payments

The lease payments are discounted using the Group's incremental borrowing rate ("IBR"). Management has applied judgments and estimates to determine the IBR at the commencement of lease. Group discounted lease payments using the incremental borrowing rate of 4.5% per annum.

##### 4.2.9 Revaluation of land and building

IAS 16 – Land and building require revaluations to be made with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period. Management has estimated a period of 3 years as sufficient regularity for revaluation of land and building.

##### 4.2.10 Valuation of investment properties

The fair value of investment properties were determined by external, independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of the properties being valued. The independent valuers provide the fair value of the Group's investment properties portfolio annually.

#### Revaluation of the Group's land and building

The Group's land and building are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Group's land and buildings were last revalued by an independent valuer not related to the Group as at 31 December 2020. The valuer has appropriate qualifications and recent experience in the fair value measurement of properties in the relevant locations. The valuation conforms to International Valuation Standards.

The fair value of land and building was determined based depreciated replacement cost method of valuation for the existing structures and the comparable method of valuation for the underlying land. The revalued land and buildings are classified under Level 3 of fair value hierarchy as the valuation technique include significant unobservable inputs used in the fair value estimation.

At 31 December 2021	114,640	3,132	117,772

Computer software licences acquired by the Group are capitalised on the basis of the costs incurred to acquire and bring into their internal use.

The group has performed the annual impairment test on Goodwill in December 2022 and 2021. For impairment testing goodwill acquired through business combinations are allocated to the following subsidiaries which are considered as CGUs;

	<i>Egyptian Saudi</i> <i>Insurance House</i>		<i>Salama Assurances</i> <i>Algeria</i>		<i>Total</i>	
	<i>2022</i>	<i>2021</i>	<i>2022</i>	<i>2021</i>	<i>2022</i>	<i>2021</i>
	<i>AED'000</i>	<i>AED'000</i>	<i>AED'000</i>	<i>AED'000</i>	<i>AED'000</i>	<i>AED'000</i>
<b>Goodwill</b>	<b>42,196</b>	42,196	<b>72,444</b>	72,444	<b>114,640</b>	114,640

For impairment testing, recoverable amount was based on fair value less cost of disposal using estimated discounted cash flows. The cash flow projections included specific estimates for five years terminal growth rate thereafter. The terminal growth rate was determined based on management's estimate of the long-term compound annual growth, consistent with the assumption that a market participant would note. The key assumptions described above may change as the economic and market conditions change. Management estimates if key assumptions increase/decrease by 1%, the carrying amount of goodwill may (decrease)/increase by AED 7.49 million.

At 31 December	<b>143,776</b>	142,055

Other than the investment property in the Kingdom of Saudi Arabia amounting to AED 85 million which is subject to ongoing legal case disclosed in note 33.

The fair value of the Group's investments properties as at 31 December 2022 has been arrived at on the basis of valuations carried on the respective dates by independent valuers who are not related to the Group and have appropriate qualifications and recent market experience in the valuation of properties.

The fair value of plots of land was determined based on the acceptable approach that reflects recent transaction prices for similar properties. The fair value of buildings was determined using investment method. In estimating the fair value of the properties, the highest and best use of the properties is their current use.

The Group's investment properties are classified as Level 3 in the fair value hierarchy as at 31 December 2022 (2021: Level 3). The rental income of properties amounts to AED 0.65 million in 2022 (2021: AED 0.64 million), there is no direct related expenses in respect of investment property. The Group investment property portfolio is being managed and maintained by a third-party administrator, and the rental income received from these properties are being set off with the administrative fees.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 16. RELATED PARTY TRANSACTIONS

The Group, in the normal course of business, collects contributions, settles claims and enters into other transactions with other businesses that fall within the definition of related parties contained in the International Accounting Standard ISA 24. The management believes that the terms of such transactions are not significantly different from those that could have been obtained from third parties. The following are the details of significant transactions with related parties.

	2022 AED'000	2021 AED'000
Contribution	2,570	3,516
Claims paid	47	9,532
General and administrative expenses	10	115
<b>Compensation of key management personnel</b>		
Short term benefits	4,980	5,687
Employees end of service benefits	176	85
	5,156	5,772
Directors' remuneration	4,800	14,200
<b>Balances with related parties</b>		
	2022 AED'000	2021 AED'000
Cash and bank balances	-	301
Investments held-to-maturity - wakalah certificates	54,094	54,094
Participants' investments in unit-linked contracts	766,393	369,494
Fixed Assets	-	262
Intangible Assets	801	500
Amount due to related party	-	405
Other assets and receivables	43,282	-

### 17. OTHER ASSETS AND RECEIVABLES

	2022 AED'000	2021 AED'000
Deferred commission	125,683	178,156
Prepaid commission	777	6,024
Profit receivable	13,126	7,826
Receivable against sales of Investments	30,523	-
Others*	62,540	64,348
	232,649	256,354

\*The other assets and receivables include other receivables amounting to AED 13.8 million which was previously subjected to a legal case, and on which the Group has won, and the court has issued performance order and is now under execution against the relevant counter parties. It also include other receivable amounting to AED 19.85 million receivable against sale of investment in Best Re Holding Limited. The management believes at this stage that these receivables are recoverable and thus, no provision has been made.

Authorised, issued and fully paid up capital 1,210,000,000 shares of AED 1 each (2021: 1,210,000,000 shares of AED 1)	<u>1,210,000</u>	<u>1,210,000</u>

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 25. TREASURY SHARES

In 2008, the Group bought back 21,669,790 shares amounting to AED 35.97 million. The treasury shares are debited as a separate category of shareholders' equity at cost. The process for capital reduction has been initiated by the Company.

### 26. STATUTORY RESERVE

In accordance with the U.A.E. Federal Law No. 32 of 2021 and the Articles of Association of the Company, 10% of the net profit is required to be transferred to a non-distributable statutory reserve until this reserve equals 50% of the paid up share capital. This reserve is not available for distribution other than in circumstances stipulated by law.

### 27. OTHER RESERVES

Other reserves include following:

	2022 AED'000	2021 AED'000
Revaluation reserve	20,753	20,753
Foreign exchange translation reserve	(156,723)	(130,718)
Investment fair value reserve	(27,154)	(27,922)
Regulatory reserve – UAE operations (Note 27.1)	3,317	1,756
	<u>(159,807)</u>	<u>(136,131)</u>

#### 27.1 Regulatory reserve – UAE operations

In accordance with Article 34 of Insurance Authority's Board of Directors Decision No.(23) of 2021, the Company has allocated an amount equals to 0.5% of the total reinsurance premiums ceded in all classes to reinsurance reserve from the effective date of the said decision. This reserve shall be accumulated year after year and may not be disposed off without the written approval of the Director General of the Insurance Authority.

### 28. NON-CONTROLLING INTEREST

The following table summarises the information relating to the Group's subsidiaries that have material non-controlling interests (NCI) as at the reporting date, before any intra group eliminations:

#### Egypt Saudi Insurance House

	2022 AED'000	2021 AED'000
Non-controlling interest share	48.85%	48.85%
Current assets	158,253	212,519

Exchange losses	65	436
Board Remuneration*	-	14,200
IT expenses	6,576	3,212
Others	15,464	21,499
	<b>148,109</b>	<b>137,043</b>

\*Board of directors' remuneration for the year ended 31 Dec 2021 amounting to AED 4,800 thousand has been charged to the equity. Management will obtain the shareholders' approval for this classification.

### 31. TAXATION – CURRENT

Taxation comprises of taxation of foreign operation, in view of the operations of the Group being subject to various tax jurisdictions and regulations, it is not practical to provide reconciliation between the accounting and taxable profits together with details with effective tax rates.

### 32. BASIC AND DILUTED EARNINGS PER SHARE

	2022	2021
Profit for the year attributable to shareholders (AED'000)	<b>28,148</b>	40,053
Number of shares (in thousands)	<b>1,188,330</b>	1,188,330
Basic and diluted earnings per share (AED)	<b>0.024</b>	0.034

Basic earnings per share are calculated by dividing the profit for the year by the number of weighted average shares outstanding at the end of the reporting period after taking into account the treasury shares held. Diluted earnings per share is equivalent to basic earnings per share as the Group did not issue any new instrument that would impact earnings per share when executed.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 33. CONTINGENT LIABILITIES AND CAPITAL COMMITMENTS

	2022 AED'000	2021 AED'000
Letter of Guarantees in favor of CBUAE	160,000	10,000
Other letter of guarantees	8,798	5,038
	<u>168,798</u>	<u>15,038</u>

Statutory Deposits (note 10) of AED 287,284 thousand (2021: AED 239,649) includes deposits amounting to AED 70,000 thousand (2021: AED 10,000 thousand) which are held as lien by the bank against the abovementioned letter of guarantee issued by bank in favor of the Central Bank of United Arab Emirates ("CBUAE"). During the year, the Group's bank has issued a guarantee of AED 150,000 thousand in favour of CBUAE to meet the solvency requirements.

Other letter of guarantee was issued during normal course of business against which term deposit of AED 8,798 thousand (note 18) which is held as lien by the bank.

#### *Ongoing legal case*

In the prior years, a bank (previously related party) has filed legal claim against the Group seeking to obligate the Group to pay a net sum of AED 258 million after setting off investment property amounting to AED 83 million and available for sale investments amounting to AED 54 million against the alleged loan granted to the Group amounting to AED 395 million during the year 2008. In 2022, the above claim was dismissed by the court in the first instance stage. As at reporting date, no provision has been considered by the Group's management in respect of this claim of AED 258 million and also aforementioned investment property and available for sale investments are continuing to be recorded in these consolidated financial statements at AED 85 million and AED 58 million respectively.

Furthermore, a Precautionary Attachment Order has been issued by the Court against the Company on the request of the bank, however, the management has taken immediate action to file a grievance request and the Court has decided to cancel the aforesaid Precautionary Attachment Order (Court Cancellation Decision). This Court Cancellation Decision has been appealed by the bank and the Court issued a decision overruling the Court Cancellation Decision (the Appeal Decision). The Management has appealed on cassation the Appeal Decision and the Appeal Court of Dubai has issued its judgement in March 2022, refuting the Letter of Demand and cancelling the legal actions taken against the Company therefore, the full amount that was blocked under the bank attachment order has been released, amounting to AED 258.46m. The Bank filed an appeal at Dubai Court of Cassation against the release of the blocked funds, however the Court of Cassation rejected the appeal and closed the dispute in favor of the Group.

The Group is exposed to certain claims and litigations, these are subject to legal cases filed by policyholders, cedants and retakaful operators in connection with policies issued. The management believes, based on independent legal counsel opinions that the ascertainment of liabilities and its timing is highly subjective and dependent on outcomes of court's decisions. Furthermore, as per independent legal counsel, the Group has strong grounds to defend the suits successfully. Accordingly, no additional provision for these claims has been made in the consolidated financial statements. However, a provision is made in respect of each individual case where it is probable that the outcome would result in a loss to the Group in terms of an outflow of economic resources and a reliable estimate of the amount of outflow can be made.

There are no significant capital commitments at 31 December 2022 (2021: nil).

### 34. OPERATING LEASE COMMITMENTS

#### *Company as a lessee*

The future minimum lease payments for contracts under non-cancellable operating lease are as follows:

	2022 AED'000	2021 AED'000
Future minimum lease payments:		
Due within one year	<u>2,755</u>	<u>2,420</u>

### 39. CLAIMS DEVELOPMENT (continued)

#### Sensitivities

The general takaful claims provision is sensitive to the key assumptions. The analysis below is performed for reasonably possible movements in key assumptions with all other assumptions held constant showing the impact on liabilities and net income.

#### 31 December 2022

		<i>Impact on gross liabilities* AED'000</i>	<i>Impact on net profit AED'000</i>
Current claims	+10%	+47,345	+26,167
	-10%	-47,345	-26,167

#### 31 December 2021

		<i>Impact on gross liabilities* AED'000</i>	<i>Impact on net profit AED'000</i>
Current claims	+10%	+57,495	+31,260
	-10%	-57,495	-31,260

### 40. CLASSIFICATION OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

The table below shows a reconciliation between line items in the consolidated statement of financial position and categories of financial instruments.

<i>31 December 2022</i>	<i>FVTPL AED'000</i>	<i>Available for-sale investments AED'000</i>	<i>Amortised cost AED'000</i>	<i>Total carrying amount AED'000</i>

### 41. FAIR VALUE OF FINANCIAL INSTRUMENT

The fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the Group determines fair values using other valuation techniques.

For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

The Group measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements

Level 1: Quoted market price (unadjusted) in an active market for an identical instrument.

Level 2: Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences.

Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which market observable prices exist. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premium used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 42. RISK MANAGEMENT

The Group issues contracts that transfer either insurance risk or both takaful and financial risks. The Group does not issue contracts that transfer only financial risk. This section summarises these risks and the way the Group manages them.

#### a) Introduction and overview

##### *Governance framework*

The primary objective of the Group's risk and financial management framework is to protect the Group's shareholders from events that hinder the sustainable achievement of the set financial performance objectives. Key management recognises the critical importance of having efficient and effective risk management systems in place.

The Group is in the phase of establishing a risk management function with clear terms of reference from the Board of Directors, its committees and the associated executive management committees.

##### *Capital management framework*

The Group has an internal risk management framework for identifying risks to which each of its business units and the Group as a whole are exposed, quantifying their impact on economic capital. The internal framework estimates indicate how much capital is needed to mitigate the risk of insolvency to a selected remote level of risk applied to a number of tests (both financial and non-financial) on the capital position of the business.

##### *Regulatory framework*

Regulators are primarily interested in protecting the rights of the policyholders and monitor them closely to ensure that the Group is satisfactorily managing affairs for their benefit. At the same time, the regulators are also interested in ensuring that the Group maintains an appropriate solvency position to meet unforeseen liabilities arising from economic shocks or natural disasters.

The operations of the Group are also subject to regulatory requirements within the UAE. Such regulations not only prescribe approval and monitoring of activities, but also impose certain restrictive provisions to minimise the risk of default and insolvency on the part of the takaful companies to meet unforeseen liabilities as these arise.

##### *Asset liability management (ALM) framework*

Financial risks arise from open positions in profit rate, currency and equity products, all of which are exposed to general and specific market movements. The main risk that the Group faces due to the nature of its investments and liabilities is the equity price risk. The Group manages these positions within an ALM framework that has been developed to achieve long-term investment returns in excess of its obligations under takaful and investment contracts.

The Group's ALM framework is also integrated with the management of the financial risks associated with the Group's other financial assets and liabilities not directly associated with takaful and investment liabilities.

The Group's ALM framework also forms an integral part of the takaful risk management policy, to ensure in each period sufficient cash flow is available to meet liabilities arising from takaful and investment contracts.

The Group is exposed to a range of financial risks through its financial assets, financial liabilities, retakaful assets and takaful liabilities. In particular, the key financial risk is that in the long-term its investment proceeds are not sufficient to fund the obligations arising from its insurance and investment contracts. The most important components of risk management includes takaful risk and financial risk

**42. RISK MANAGEMENT (continued)**

**b) Takaful risk**

Takaful risk is where the Group agrees to indemnify the insured parties against happening of unforeseen future insured events. The frequency and severity of claims are the main risk factors. As per the practices adopted by the Group, actual claim amounts can vary marginally compared to the outstanding claim reserves but are not expected to have a material impact.

*Frequency and severity of claims*

The frequency and severity of claims can be affected by several factors. The Group underwrites property, engineering, motor, miscellaneous accident, marines and personal accident classes. These classes of takaful are generally regarded as short-term takaful contracts where claims are normally intimated and settled within a short time span. This helps to mitigate takaful risk.

*Property*

For property takaful contracts, the main perils are fire damage and other allied perils and business interruption resulting there from.

These contracts are underwritten either on replacement value or indemnity basis with appropriate values for the interest insured. The cost of rebuilding or repairing the damaged properties, the time taken to reinstate the operations to its pre-loss position in the case of business interruption and the basis of takaful are the main factors that influence the level of claims.

*Engineering*

For engineering takaful contracts, the main elements of risks are loss or damage to insured project works and resultant third party liabilities, loss or damage to insured plants, machinery and equipment and resultant business interruption losses. The extent of the loss or damage is the main factor that influences the level of claims.

*Motor*

For motor takaful contracts, the main elements of risks are claims arising out of death and bodily injury and damage to third party properties as well as that of insured vehicles.

The potential court awards for death and bodily injury and the extent of damage to properties are the key factors that influence the level of claims.

*Miscellaneous accident*

For miscellaneous accident classes of takaful such as loss of money, infidelity of employees, personal accident, workmen's compensation, travel, general third party liability and professional indemnity are underwritten.

The extent of loss or damage and the potential court awards for liability classes are the main factors that influence the level of claims.

*Marine*

In marine takaful the main risk elements are loss or damage to insured cargo and hull due to various mishaps resulting in the total or partial loss claims. The extent of the loss or damage is the main factor that influences the level of claims.

*Family takaful contracts*

Underwriting is managed at each business unit through a dedicated underwriting department, with formal underwriting limits and appropriate training and development of underwriting staff. The underwriting policy is clearly documented, setting out risks which are unacceptable and the terms applicable for non-standard risks.

Health selection is part of the Group's underwriting procedures, whereby contributions are charged to reflect the health condition and family medical history of the applicants. Pricing is based on assumptions, such as mortality and persistency, which consider past experience and current trends. Contracts including specific risks and guarantees are tested for profitability according to predefined procedures before approval.

Products are reviewed by the business units on an annual basis to confirm, or otherwise, that pricing assumptions remain appropriate. Analysis is performed on earnings and liability movements to understand the source of any material variation in actual results from what was expected. This confirms the appropriateness of assumptions used in underwriting and pricing.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 42. RISK MANAGEMENT (continued)

#### b) Takaful risk (continued)

##### Retakaful risk

In line with other takaful and retakaful companies, in order to minimise net loss exposure arising from large claims, the Group, in the normal course of business, enters into agreements with other parties for retakaful purposes. Such retakaful arrangement provides for greater diversification of business, allow management to control exposure to potential losses arising from large risks, and provide additional capacity for growth.

To minimise its exposure to significant losses from reinsurers' insolvencies, the Group evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities or economic characteristics of the reinsurers.

Assets, liabilities, income and expense arising from ceded retakaful contracts are presented separately from assets, liabilities, income and expense from the related takaful contract because the retakaful ceded contracts do not relieve the Group from its obligations and as a result the Group remains liable for the portion of outstanding claims reinsured to the extent that the retakaful fails to meet the obligations under the retakaful agreements.

##### Concentration of takaful risk

The Group has certain single takaful contracts which it considers as risks of high severity but very low frequency. The Group cedes substantial part of these risks and its net retention on any one single event is limited to AED 1 million (2021: AED 1 million).

##### Terms and conditions of takaful contracts

Takaful is based on uncertainty of event. As such the terms and conditions of takaful contracts varies but are normally based on the international guidance and policy wordings as followed by all takaful companies in the market.

Normally a takaful contract contains the coverage of the subject of takaful, the exclusions and obligations of the insured and the insurers. Deviations are reported forthwith to the insurer by the insured and any accident event to be reported immediately. Long tail business is generally that where the time period to ultimately finalise and settle claims could take a number of years.

The Group's estimates for reported and unreported losses and establishing resulting provisions and related retakaful recoverables are continually reviewed and updated, and adjustments resulting from this review are reflected in the consolidated statement of profit or loss. The process relies upon the basic assumption that past experience, adjusted for the effect of current developments and likely trends, is an appropriate basis for predicting future claims.

Reserving risks are addressed by ensuring prudent and appropriate reserving for business written by the Group, thus ensuring that sufficient funds are available to cover future claims. Reserving practises for the General Takaful and Individual Family Takaful Portfolio involve the use of actuarial analysis from an independent actuary.

#### c) Financial risks

The Group has exposure to the following primary risks from its use of financial instruments:

- Credit risk,
- Liquidity risk,
- Market risk, and
- Operational risk.

##### i) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss to the other party by failing to discharge an obligation.

A credit risk policy setting out the assessment and determination of what constitutes credit risk for the Group has been established and policies and procedures are in place to mitigate the Group's exposure to credit risk. Compliance with the policy is monitored and exposures and breaches are regularly reviewed for pertinence and for changes in the risk environment.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 42. RISK MANAGEMENT (continued)

#### c) Financial risks (continued)

##### i) Credit risk (continued)

For all classes of financial assets held by the Group, other than those relating to retakaful contracts, the maximum credit risk exposure to the Group is the carrying value as disclosed in the consolidated financial statements at the consolidated financial position date.

Retakaful is placed with reinsures and retakaful companies approved by the management, which are generally international companies that are rated by international rating agencies or other GCC companies.

To minimise its exposure to significant losses from reinsurer and retakaful insolvencies, the Group evaluates the financial condition of its reinsures and retakaful companies and monitors concentrations of credit risk arising from similar geographic regions, activities or economic characteristics of the reinsures and retakaful companies.

At each reporting date, management performs an assessment of creditworthiness of reinsures and retakaful companies updates the retakaful purchase strategy, ascertaining suitable allowance for impairment if required.

The Group monitors concentrations of credit risk by sector and by geographic location.

Credit risk is controlled through terms of trade for receipt of contributions. Most of the counterparties are takaful companies that are generally not rated. However, they are selected on their standing in the market, rating, relationship experience and length of association. All retakaful counterparties are rated.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the end of the reporting period was as disclosed in Note 39.

##### ii) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Liquidity requirements are monitored on a daily basis and management ensures that sufficient funds are available to meet any commitments as they arise.

#### Maturity profiles

The table below summarizes the maturity profile of the financial liabilities of the Group based on remaining undiscounted contractual obligations. Repayments which are subject to notice are treated as if notices were to be given immediately.

31 December 2022	<i>Less than 180 days AED'000</i>	<i>180 days to 1 year AED'000</i>	<i>1-5 year AED'000</i>	<i>Over 5 year AED'000</i>	<i>No stated maturity AED'000</i>	<i>Total AED'000</i>

The Group's exposure to profit rate risk relates to its deposits. On 31 December 2022, deposits carried profit at the range of 0.20% to 0.85% per annum (2021: 0.18% to 0.58% per annum).

If profit rates had been 50 basis points higher/lower throughout the year and all other variables were held constant, the Group's profit for the year ended 31 December 2022 and equity as at 31 December 2022 would increase/decrease by approximately AED 3.42 million (2021: AED 3.38 million). The Group's sensitivity to profit rates has not changed significantly from the prior year.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 42. RISK MANAGEMENT (continued)

#### c) Financial risks (continued)

##### iii) Market risk

Market risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual security, or its issuer, or factors affecting all securities traded in the market. The Group limits market risk by maintaining a diversified portfolio and by continuous monitoring of developments in local equity and sukuk markets. In addition, the Group actively monitors the key factors that affect stock and sukuk market movements, including analysis of the operational and financial performance of investees.

##### a. Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates and arises from financial instruments denominated in a foreign currency. The Group's functional currency is the UAE Dirham.

The significant financial assets and liabilities exposed to currency risk in equivalent thousand of Dirham are as under:

#### 31 December 2022

	<i>Financial assets AED'000</i>	<i>Financial liabilities AED'000</i>	<i>Net AED'000</i>

### 42. RISK MANAGEMENT (continued)

#### c) Financial risks (continued)

##### (b) Equity price risk

Equity price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from profit rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Group's price risk policy requires it to manage such risks by setting and monitoring objectives and constraints on investments, diversification plans, limits on investments in each country, sector and market and careful and planned use of derivative financial instruments.

#### Sensitivities

The analysis below is performed for reasonably possible movements in equity prices with all other assumptions held constant showing the impact on net profit or equity.

#### Coronavirus (COVID-19) outbreak and its impact on the Group

With the rapid development of the coronavirus disease (COVID-19) outbreak, the world economy entered a period of unprecedented health care crisis that has already caused considerable global disruption in business activities and everyday life. Certain countries including the United Arab Emirates (UAE) have adopted extraordinary and economically costly containment measures and have required companies to limit or even suspend normal business operations.

Management has considered the unique circumstances and the risk exposures of the Group that could have a material impact on the business operations and has concluded that the main impacts on the Group's profitability/liquidity position may arise from:

- recoverability of contribution and takaful balances receivable,
- unavailability of personnel,
- reduction in gross contribution due to non-renewal of policies,
- provision for outstanding claims and claims incurred but not reported,
- fair value measurement of financial instruments and investment properties held by the Group.

Based on the above consideration, management has concluded that there is no significant impact on the Group's profitability position as at reporting date. The Group has implemented business continuity plan that includes all the procedures and protocols during these current situations. Remote working plans were initiated, and measures were taken to ensure uninterrupted business.

Further, the Group has performed stress testing as required by the Insurance Authority of UAE approved by the Board of Directors, who are satisfied that the Group will continue to operate as a going concern. Accordingly, these financial statements have been prepared on a going concern basis. Management will continue to monitor the situation and, will take necessary and appropriate actions on a timely basis to respond to this unprecedented situation.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 43. CAPITAL RISK MANAGEMENT

The Group's objectives when managing capital are:

- To comply with the capital requirements required by the UAE Federal Law No. (6) of 2007 regarding the Establishment of the Insurance Authority and Insurance Operations.
- To safeguard the Group's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To provide an adequate return to shareholders by pricing takaful contracts commensurately with the level of risk.

In UAE, the local takaful regulator specifies the minimum amount and type of capital that must be held by the Group in addition to its takaful liabilities. The minimum required capital (presented below) must be maintained at all times throughout the year. The Group is subject to local takaful solvency regulations with which it has complied during the year.

The below summaries the minimum regulatory capital of the Group and the total held.

	2022 AED'000	2021 AED'000
Minimum regulatory capital	100,000	100,000
Total shareholders' equity	741,851	767,487

The UAE Insurance Authority has issued a Resolution No. 42 for 2009 setting the minimum subscribed or paid up capital of AED 100 million for establishing takaful companies and AED 250 million for re-insurance companies. The resolution also stipulates that at least 75 percent of the capital of the takaful companies established in the UAE should be owned by UAE or GCC national individuals or corporate bodies. The Group is in compliance with these requirements.

### 44. FEES AND PENALTIES

During the year ended 31 December 2022, Group has paid fees and penalties amounting to AED nill (2021: AED 22,503).

### 45. DIVIDEND & BOD REMUNERATION

At the annual general meeting held on 29 April 2022, the Shareholders approved a cash dividend of AED 23.75 million (2 fils per share) for the year ended 31 December 2021 (2020: 8.25 fils per share AED 98.04 million for year ended 31 December 2020).

Shareholders have also approved the Directors Remuneration fee subject to the compliance with the rules & regulation. Subsequently, the Group has paid BOD remuneration of AED 4,800 thousand for the year ended 31 Dec 2021 (AED 14,200 thousand for 2020). Previously the BOD remuneration has been charged in profit & loss however for 2021 this was recorded under equity.

### 46. CAPITAL RISK MANAGEMENT

The solvency regulations identify the required Solvency Margin to be held on consolidated basis in addition to insurance liabilities.

The Solvency Margin (presented in the table below on consolidated basis) must be maintained at all times throughout the year/period. The Company is subject to solvency regulations which it has complied with during the period. The Company has incorporated in its policies and procedures the necessary procedures to ensure continuous and full compliance with such regulations.

# ISLAMIC ARAB INSURANCE CO. (SALAMA) PJSC AND ITS SUBSIDIARIES

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 31 December 2022

### 46. CAPITAL RISK MANAGEMENT (continued)

The table below summarises the consolidated Minimum Capital Requirement ("MCR"), Minimum Guarantee Fund and Solvency Capital Requirement of the Company and the total capital held at the Company level to meet the required Solvency Margins in line with the requirements of the UAE Insurance Authority. The Group has disclosed the preliminary solvency position as of 31 December 2022 as following;

	<b>31 December 2022 AED'000</b>	<b>31 December 2021 AED'000</b>
Minimum Capital Requirement (MCR)	<b>100,000</b>	100,000
Solvency Capital Requirement (SCR)	<b>238,159</b>	228,421
Minimum Guarantee Fund (MGF)	<b>148,427</b>	116,471
Basic Own Funds	<b>198,261</b>	(226,139)
MCR Solvency Margin (Surplus/deficit)	<b>98,261</b>	(326,139)
SCR Solvency Margin (Surplus/deficit)	<b>5,102</b>	(454,560)
MGF Solvency Margin (Surplus/deficit)	<b>94,834</b>	(342,610)

During the year, the Group's bank has issued a letter of guarantee for AED 150,000 thousand in favor of the Central Bank of UAE (formerly the "Insurance Authority") to meet the solvency requirements of the Group.

### 47. APPROVAL OF THE CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements were approved by the Board of Directors and authorized for issue on 20 March 2023.

### 48. ACQUISITION OF PORTFOLIO OF DUBAI ISLAMIC INSURANCE AND REINSURANCE COMPANY

On 28th December 2022, The Board approved the endorsement made by the Investment committee regarding the acquisition of the non-life portfolio from Dubai Islamic Insurance and Reinsurance Company – AMAN PJSC (Aman) of a portion of Aman's general, motor, medical, and group family Takaful (the takaful alternative to group life insurance) portfolios. Purchase value is AED 15 million subject to customary adjustments and regulatory approvals. The portfolio will add synergies to Salama's existing offering and create value for the shareholders, by expanding its market leading position. The transaction is not expected to have any impact on the rights of Salama's shareholders. The discussions between the parties are at the final stage, subject to signing of binding agreements and obtaining necessary approvals (including Sharia approvals and regulatory approvals). The targeted execution date of the transaction is first quarter of 2023, subject to obtaining all approvals (including Sharia approvals and regulatory approvals) and completion of all necessary transfer of the portfolio as planned and agreed between the two companies.

### 49. SUBSEQUENT EVENTS

- *Statutory merger with Takaful Emarat Insurance*

On 14th October 2022, a merger was announced between Salama and Takaful Emarat (TE) in accordance with Article 47(1)(a) of the public M&A rules. TE will be merged into Salama, which will be the surviving entity Salama, and all of TE's assets and liabilities will be merged into Salama. This will be a cashless transaction, with existing TE shareholders receiving new shares in Salama as part of the statutory merger.

However, on 16th February 2022, Salama announced that it would not be pursuing the merger with TE as previously planned. Instead, discussions were initiated for an alternative arrangement that would involve only the acquisition of TE's takaful operation, and not the company's assets as a whole.

**49. SUBSEQUENT EVENTS (continued)**

- *Reduction Of Share Capital by AED 270m*

During a general assembly meeting held on 16 January 2023, the company's shareholders approved a capital reduction plan aimed at eliminating accumulated losses. The plan involves cancelling 270,411,002 company shares, each with a value of AED 1. The board of directors had previously decided on 5 August 2022 to initiate the capital reduction process, with the cancellation of shares scheduled to take place on 24 March 2023. This will reduce the company's capital from AED 1,210,000,000 to AED 939,588,998 and the total number of shares to 939,588,998 shares, each with a nominal value of one UAE dirham.

**50. TAXATION OF CORPORATIONS AND BUSINESSES**

On 9 December 2022, the UAE Ministry of Finance released the Federal Decree Law No. (47) of 2022 on the Taxation of Corporations and Businesses (the Law) to enact a Federal Corporate Tax (CT) regime in the UAE. The CT regime will become effective for accounting periods beginning on or after 1 June 2023.

A rate of 9% will apply to taxable income exceeding a particular threshold to be prescribed by way of a Cabinet Decision (expected to be AED 375,000 based on information released by the Ministry of Finance), a rate of 0% will apply to taxable income not exceeding this threshold. In addition, there are several other decisions that are yet to be finalised by way of a Cabinet Decision that are significant in order for entities to determine their tax status and taxable income. Therefore, pending such important decisions, the Group has considered that the Law, as it currently stands, is not substantively enacted as at 31 December 2022 from the perspective of IAS 12 – Income Taxes. The Group shall continue to monitor the timing of the issuance of these critical Cabinet Decisions to determine their tax status and the application of IAS 12 – Income Taxes.

The Group is currently in the process of assessing the possible impact on the consolidated financial statements, both from current and deferred tax perspective, once the Law becomes substantively enacted.
