Fund Manager Comments

The Global economy remains resilient despite the rise of populist and geopolitical tensions which are increasing the risk profile. The rise in barriers like visas, tariffs and sanctions are constraining the movement of goods, people and capital which is having a negative impact on global trade, growth and inflation. There has also been a rapid rise in government debt since the Covid pandemic, due to massive fiscal spend and more recently to support domestic production of semiconductors and other essential goods, together with the rise in defence spending. Inflation has declined in major economies driven by a rapid decline in goods inflation with service inflation remaining resilient due to the tight labour markets. More recently there are signs that the labour market is slowing with unemployment rising marginally. With real wages becoming positive and with central banks likely to cut interest rates, disposable income should rise.

With inflation moving into target ranges we have seen the start of interest rate cuts by the Central Banks of Europe, Switzerland and Canada. Income yields are still attractive in nominal and real terms which continue to create opportunities to invest in attractive yields and to maximise returns for our income portfolios. We remain focused on investing in high quality issuers with strong and sustainable cash flows.
