Fund Manager Comments

The global economy has slowed marginally but has remained resilient. Inflation is declining to target ranges, despite relatively high services and wage inflation, while goods inflation is below trendline as supply chains are being restored. The interest rate cutting cycle is in full swing, with the Fed cutting 50bps and the EU implementing its second 25bps cut. The looser monetary policy, supported by robust fiscal spend, will support the global economy. Populism, geopolitics, trade wars and high debt levels, together with the downward adjustment in the Chinese economy, remain significant risks to the global economy and financial markets. Gold, the ultimate risk diversifier and store of value continue to reach new all-time highs while the US Dollar has started weakening from its peak levels.

The 3rd Quarter has seen a softening of the Magnificent 7 and continued weakness in Chinese stocks and commodity stocks with a high dependence on Chinese demand. The change from Western companies benefiting through higher profits from "Made in China", to "Made by China" (Chinese Brands) is accelerating. The export of Chinese Brands are capturing significant market shares which are putting pressure on sectors like the European motor industry and the global value focused fast fashion stocks. There has been significant rotation to interest rate sensitive, "old economy" and emerging market stocks which enjoyed a good quarter.

Our portfolio remains very attractive relative to the global benchmarks, due to its focus on great companies, with supreme profitability (ROAE & ROIC), strong balance sheets (Debt/EBITDA), superior cash flows (Free Cash Flow) and are attractively priced based on PE, EV/EBITDA and DY. Your portfolio has a high exposure to stocks with 1) secular growth 2) beneficiaries of interest rate cuts and 3) stocks that diversifies risk like gold shares.
