### Investment Objective

The Fund will aim to achieve medium to long term capital growth through direct investments made in Shari'a compliant Indian equities. The Fund will use an active management style and take advantage of price distortions and specific opportunities that display potential for strong gains. It will invest in stocks which are, in the opinion of the Shari'a Board, compliant with Shari'a guidelines.

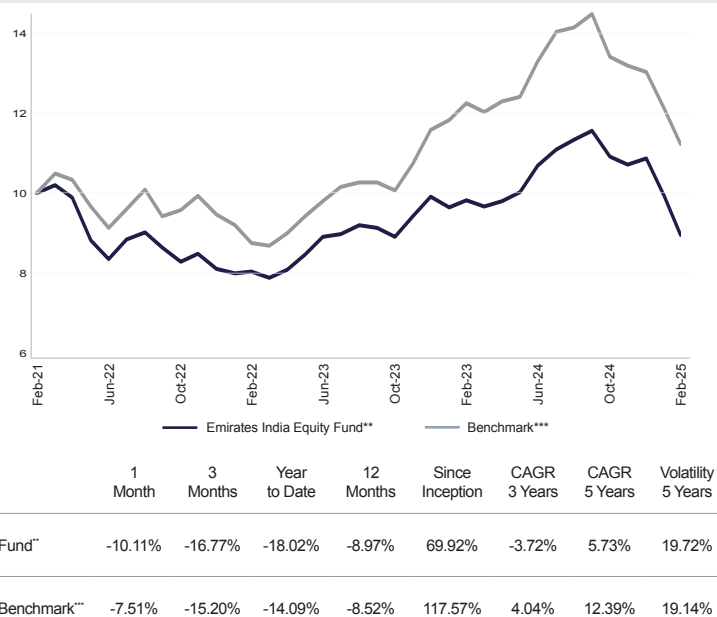

### Monthly Commentary

Indian equities' prices seemed to have stabilized in early February, however, weakness resumed thereafter due to policy uncertainty in US coupled with high valuations, rupee weakness, softer earnings, and FII outflows. Correction was particularly visible in small and mid-cap names while banking stocks were unscathed.

The Fund was down in February due to overweight position in growth and mid-cap stocks. Historically, corrections and subsequent recovery in Indian equities lasted 4-8 months, suggesting the worst may be behind us after a 5-month downturn (Sept '24-Feb '25). This gives us confidence of healthy returns over the remainder of 2025.

We remain positive on Indian equities on a structural basis, driven by durable growth and favorable geopolitical factors. The Fund is well diversified with focus on high-quality, growth companies with strong business moats, solid management, and long-term earnings potential.

### Performance
